Fac Omnia Bene – Do All Things Well

This guide describes the curriculum offered in years 8 to 12 at Brighton Secondary School for 2019. Subject selection at the secondary level is very important in shaping future pathways and links between school, further study and the world of work.

The curriculum at Brighton Secondary School is aligned with both state and national expectations for all schools. In addition, a number of specific programs are offered which meet the particular needs of our school community.

In keeping with the Melbourne Declaration Educational Goals for Young Australians (2008), we aim to promote and to lead world’s best practice for curriculum delivery and assessment and improve the educational outcomes for all students.

We want our students to graduate with world class skills in order to succeed in work and life.

Our vision is to develop strategic learners who are prepared for varied and unpredictable career paths in a global digitized world.

Staff are committed to developing the school as a community of stakeholders with shared responsibility to create optimal conditions for sustained, relevant and rigorous learning to be successful global and digital citizens. We commit to embracing the Cross Curriculum Priorities and the General Capabilities of the Australian Curriculum.

Positive Education strategies are embedded across the curriculum with a focus on the development of growth mindsets in students’ approaches to learning. We promote the character qualities of Citizenship, Courage and Curiosity.

The iPad and Macbook program at Brighton Secondary School provides a vehicle for a personalised learning program and support a constructivist approach to a creative curriculum for students at Brighton Secondary School.

Love of Learning
Social Intelligence
Appreciation of Beauty & Excellence
Course Counselling

Home Group teachers help to prepare students for subject selection with the support of House Leaders and the Principal Team. A specialist staff team that includes the Assistant Principal Senior Schooling, Student Counsellors and the Career Development Coordinator are also on hand to advise on particular pathways and/or subject choices. Students and parents are encouraged to contact subject teachers for specific information about particular subjects. Courses for 2019 will be provisionally approved at the beginning of term 4 and confirmed in November, once final assessment grades are known. Although every effort will be made to meet students’ preferred choices, this will be possible only within the school’s capacity to provide the required teachers and to form viable classes.

Online Course Selection Process

Early in term 3 students will receive an instruction guide with a unique user name and password allowing them to log in to the course selection program from school or at home. When a student logs in they will see an individually customised screen where they can select subjects from several drop down menus.

On completion of the online course selection process, an authentication slip must be printed and signed by the student’s parent or caregiver and returned to the student’s Home Group teacher.

Students will receive login instructions via their Home Group teacher.

Recommendations to all students about selecting a course

• It is important to consider possible future pathways based on your current level of performance as well as your aspirations and capabilities. You should seek as much advice and information as possible in determining a realistic learning program.
• It is important to be aware of the subject selection process. You need to know, for example, the number of subjects that you must select, the subject selection timeline, and the staff who are involved that can answer your questions.
• In thinking about future pathways, you will need to consider the possibilities of university entry, TAFE enrolment and employment. Universities and TAFE institutes impose their own criteria for selection purposes.
• Refer to the Post School Pathways section of this booklet for more information.
• Look carefully at information in the various flow charts. If you need further clarification on a particular subject you should speak to the contact person listed in the subject entry.
• Seek information from a variety of sources including subject teachers and coordinators. The more information you have, the more informed will be your choices and the greater chance you will have of achieving personal success. Also refer to the back of this book for a list of useful publications/websites.

Specific Recommendations to year 10 and 11 students

You will need to thoroughly familiarise yourself with the range of SACE and flexible learning options.
• Learn the terminology used to describe the senior school curriculum.
• Understand the requirements of the South Australian Certificate of Education (SACE) and Vocational Education and Training (VET).
• Refer to the SACE section and the glossary in the back of this booklet.
Information for International Students

French and Japanese (years 8-12) languages can be studied at the school while other languages can be studied off line by negotiation. In 2019 a cross-disciplinary course (Indonesian, People and Culture) is offered at year 10 and 11.

The school offers an Intensive Secondary English Course (ISEC). The ISEC program is delivered in a learning environment that nurtures social cohesion and intercultural perspectives for students before they enter the mainstream. This class usually consists of no more than 15 students, who have a program specially designed to assist in developing their English proficiency, their knowledge of Australia and Australian lifestyle and introductory courses designed to familiarise students with schooling in Australia. Refer to page 77 for more information.

English as an Additional Language and language support is available at year 10, Stage 1 and 2 levels, and a strong Home Group lesson program supports students’ welfare and orientation.

Entry to Special Interest Program subjects in Music or Volleyball is considered by special application on an individual basis.

The International Student Program Coordinator and Student Support Officer supervise and support all international students at the school.

Brighton Secondary School delivers education programs to international students on behalf of Department for Education South Australia.

The Special Interest Music program provides unique opportunities for students to reach their musical potential while surrounded by like-minded peers. Brighton Secondary School is recognised nationally and internationally as one of the strongest music programs in South Australia.

Special Interest Music

The Special Interest Music Program fosters musical and academic excellence in gifted and highly committed young musicians through a comprehensive music curriculum.

Our strong extra-curricular ensemble program has raised the school’s national and international profile through participation in music festivals, cultural events and tours, such as:

- International tours
- Generations in Jazz in Mount Gambier
- ABODA Band Festival
- Australian International Music Festival
- Adelaide Choral Eisteddfod
- ANZAC Day and Remembrance Day ceremonies
- Italian National Day celebrations
- Events at Government House
- Artists in residence
- Collaborations with the other Special Interest Music Centres

Pathways

Students have the opportunity to work in a wide range of musical settings that will reinforce the concepts of life-long learning and global citizenship while providing pathways into tertiary education and careers in the music industry.

The Structure and Content

In years 8 to 10, students will study a variety of theoretical and practical subjects with more personalised choices available in years 11 and 12. Special Interest Music students study CORE MUSIC and SPECIAL INTEREST MUSIC in years 8 to 10.

The content of the course includes:

- composing and arranging
- listening studies, score reading and analysis
- solo performance
- ensemble performance
- study of a second instrument
- chamber music
- improvisation
- rhythmic studies
- keyboard studies
- aural musicianship

Students will participate in one or more of the school’s ensembles.

Selection Procedures

Special Interest Music Students are selected by audition. Applicants are required to:

- undertake a pre-audition musicianship assessment
- undertake a practical aural assessment
- perform on their instrument(s) or voice.

Instrumental or vocal performance should demonstrate a degree of musical achievement and/or potential. A specific grade or level is not required.

Further information about music subjects can be found on pages 44 to 49.

Further information about application processes and timelines is available on the school’s website www.brightonss.sa.edu.au
The Special Interest Volleyball program is acknowledged throughout Australia and overseas for its pursuit of excellence in volleyball and athletic development, establishing it as one of the prominent specialist school sporting programs in the country.

**Special Interest Volleyball**

The aim of the Special Interest Volleyball (SIV) course is to maximise the holistic athletic development of talented students who have been identified from schools throughout the state. Our goal is to promote skills, behaviours, attitudes and knowledge that will benefit students in their performance of volleyball and other sports, academic and vocational pursuits, as well as personal development.

**Pathways**

The SIV subject is offered from year 8 to year 12. This allows students to develop the skills and behaviours that are consistent with the goals of the program.

**The Structure and Content**

There are three main areas of the program. The four lessons per week that are timetabled during normal lesson time forms the main component of the program. This component is assessed and reported using criteria relevant to the Health and Physical Education curriculum, with a distinct specialisation in Volleyball.

The other two areas of the program are the training and competition opportunities. These involve before and after school training and participation in a variety of state and national competitions.

Students are selected into teams to compete in state and national tournaments on the basis of their performance and playing roles.

**Selection Procedures**

Special Interest Volleyball at year 8 level is studied by the students who have applied and been selected into the program. Entry is through physical testing, observations and documentation of previous school performance. Selection trials are held during term 2 for year 7 out of zone applicants. Entry into the SIV program in years 9-12, and in-zone year 7s are held in term 3.

Further information about volleyball subjects can be found under the Health and Physical Education section.

Further information about application processes and timelines is available on the school’s website [www.brightonss.sa.edu.au](http://www.brightonss.sa.edu.au)
The Think Bright Program has a focus upon challenge through critical and creative thinking processes that enriches the learning experience for students who have demonstrated initiative, leadership, problem solving abilities and an interest in rigorous learning. The program promotes growth mindset through integrated, entrepreneurial and collaborative learning strategies with personalised and challenge-based approaches.

Think Bright is a dynamic, innovative and interdisciplinary program for students who love to learn, that embraces inquiry approaches as part of the culture.

**Structure of the Curriculum**

For years 8-10 Think Bright students remain in the same class for the core subjects of Science, Mathematics, English and Humanities (History and/or Geography).

In each year level, Think Bright students also undertake a semester-length specialised subject of F1 in schools in year 8, Challenge-Based Learning (CBL) unit in year 9 and STE(A)M in year 10.

Home Group and other subject choices are integrated with students outside of the Think Bright program.

**Curriculum Content**

The curriculum and delivery is aligned to the Australia Curriculum with an emphasis on integrated and challenge-based learning. Classes embrace a focus of developing higher order thinking skills and developing growth mindsets in all learners with the understanding that students increasingly drive their own learning pathways.

**Pedagogy**

The pedagogy is aligned to the SA Teaching for Effective Learning (TfEL). The teachers embrace inquiry and challenge-based approaches to learning. Students have the opportunity to work individually and in teams. The use of technology is an integral part of students’ learning.

**Selection Procedures**

Entry into the program comprises of a written application and supporting documentation. Short-listed applicants will be asked to attend an interview and workshop activities.
STEM (Science, Technology, Engineering and Mathematics) Program has been developed to prepare students for careers and further study in the areas of Science, Technology, Engineering and Mathematics. In addition to learning specific curriculum content, STEM encourages critical and creative thinking, challenge-based and collaborative learning.

Curriculum

Students enrolled in the STEM program have access to a full year of STEM specific classes from Years 8-10 aligned to the Australian Curriculum. These classes have an emphasis on STEM pedagogical approaches.

Structure

Students are expected to participate in STEM specific classes. Within these classes there are a number of exciting projects, some only available to STEM students. These projects include but are not limited to:

- F1 in Schools
- Subs in Schools
- Mini ROVs
- Drone Design
- Rockets and The Space Industry
- Peg Challenge
- Robotics in industry
- Eco/Emergency Housing
- Hostile Environment Buildings (Space / Underwater)

Pedagogy

The pedagogy is aligned to the SA Teaching for Effective Learning (TfEL). The teachers embrace inquiry and challenge-based approaches to learning. Students have the opportunity to work individually and in teams. The use of technology is an integral part of students’ learning.

Selection Procedures

Entry into the program is comprised of a written application and supporting documentation. Short-listed applicants will be asked to attend an interview and workshop activities.
Company Bright develops in-depth knowledge and practical skills in the performing arts through rigorous tailored programs that value curiosity, creativity, collaboration and critical thinking. As students graduate the Company Bright Program and move into Stage 1 and 2 Drama they will have increasing opportunities to develop their collaborative skills through varied production company models.

With outstanding performance opportunities utilising the Brighton Performing Arts Centre’s state-of-the-art technology, alongside mentoring by industry experts, our students develop exceptional skills in both production and performance.

**Curriculum**

Students enrolled in Company Bright are enrolled in a full year specialised production and performance classes from years 8-10 aligned with the Australian Curriculum. Pedagogical approaches include inquiry based and student centred learning with a focus on learner voice.

**Structure**

**Year 8**

Skills in stagecraft will be emphasised through improvisation and creative performance building tasks. Underpinning the year 8 program is the inquiry question ‘What matters to you? What tools can actors and designers use to communicate their ideas?’ Students work in small groups as production companies towards a public performance. By the end of year 8 students will choose an area of focus either in onstage or off stage roles developing a deep knowledge of their chosen role.

**Year 9**

‘What makes good storytelling?’ Students explore this inquiry question through theatre and film and present their work in numerous ways including public performance opportunities. Collaborative learning is further developed through exploration and experimentation within their chosen area supported by workshops with industry experts.

**Year 10**

Performance opportunities are more sophisticated and challenging. Students will work with a design mentor and a writing mentor (Stephen Sewell, NIDA) to devise new works constructed from an inquiry process facilitated by and supported through teaching staff and the mentor program.

**Selection Procedures**

Entry into the program is comprised of a written application and supporting documentation. Short-listed applicants will be auditioned.

*N.B. Company Bright begins in 2019 with year 8 intake*
Schools play a vital role in promoting the intellectual, physical, social, emotional, moral, spiritual and aesthetic development and wellbeing of young Australians, and in ensuring the nation’s ongoing economic prosperity and social cohesion.

The Australian Curriculum

The Australian Curriculum sets out what all young Australians are to be taught, and the expected quality of that learning as they progress through schooling. At the same time, it provides flexibility for teachers and schools to build on student learning and interest.

In 2008, the Australian education ministers agreed that a national curriculum would play a key role in delivering quality education and committed to the development of a Foundation to year 12 national curriculum.

The Australian Curriculum is the mandated curriculum for years 8 to 10. The South Australian Teaching for Effective Learning Framework (TfEL) supports the implementation of the Australian Curriculum through a focus on pedagogy in the design of learning and teaching programs responsive to the needs of all learners.

The Structure of the Australian Curriculum

The Australian Curriculum is made up of three interconnected elements:

- learning areas
- general capabilities
- cross-curriculum priorities.

The general capabilities are skills, dispositions, understandings and attributes considered crucial to young people’s successful participation in 21st century life and work. The seven general capabilities include: literacy, numeracy, ICT competence, critical and creative thinking, personal and social, intercultural understanding and ethical behaviours. These general capabilities will be made explicit in each learning area as appropriate.

Three cross-curriculum priorities are also embedded within learning areas:

- Aboriginal and Torres Strait Islander histories and cultures
- Asia and Australia’s engagement with Asia
- Sustainability.

These are designed to ensure that the Australian Curriculum is relevant and prepares students for active and responsible local and global citizenship.

More information can be found at: www.australiancurriculum.edu.au

**CHOICE SUBJECTS BRIGHTON 1**
- Art For Our Life
- Art In Our World
- Chefs in Action
- Core Music A
- Core Music B
- Design It – Make It – Race It
- Food & Product Design Technology
- Languages B (French or Japanese)
- Materials Technologies
- Music Experience
- Physical Education
- Systems Technologies
- Theatre Elements

**CHOICE SUBJECTS BRIGHTON 2 (SPECIAL INTEREST VOLLEYBALL)**
- Art For Our Life
- Art In Our World
- Chefs in Action
- Core Music A
- Core Music B
- Design It – Make It – Race It
- Food & Product Design Technology
- Languages B (French or Japanese)
- Materials Technologies
- Music Experience
- Systems Technologies
- Theatre Elements

**Note:** If Core Music A is chosen, Core Music B must be chosen as well. Studying only Core Music A does not prevent the study of Core Music in year 9, for SIV students.

In subjects labelled A or B (such as Music and Languages) subject A must be studied before subject B.

**BRIGHTON 4 (THINK BRIGHT)**
- Art For Our Life
- Art In Our World
- Chefs in Action
- Core Music A
- Core Music B
- Food & Product Design Technology
- Languages B (French or Japanese)
- Materials Technologies
- Music Experience
- Physical Education
- Systems Technologies
- Theatre Elements

**BRIGHTON 5 STEM**
- Art For Our Life
- Art In Our World
- Chefs in Action
- Core Music B
- Food & Product Design Technology
- Languages B (French or Japanese)
- Materials Technologies
- Music Experience
- Physical Education
- Systems Technologies
- Theatre Elements

**BRIGHTON 6 (COMPANY BRIGHT)**
- Art For Our Life
- Art In Our World
- Chefs in Action
- Core Music A
- Food & Product Design Technology
- Languages B (French or Japanese)
- Materials Technologies
- Music Experience
- Physical Education
- Systems Technologies

**Note:** If Core Music A is chosen, Core Music B must be chosen as well.

**Studying only Core Music A does not prevent the study of Core Music in year 9, for Company Bright students.**

In subjects labelled A or B (such as Music and Languages) subject A must be studied before subject B.

*Choice options within the compulsory HPE Australian Curriculum.
Students who successfully complete their senior secondary education in South Australia are awarded the South Australian Certificate of Education (SACE).

**Information about the SACE**

The South Australian Certificate of Education (SACE) is an internationally recognised qualification awarded to students who successfully complete certain requirements in their senior secondary education. The SACE forms the basis for entry into higher education.

The SACE ensures that students gain the skills they need for the future, as citizens and employees in a rapidly changing global and technological environment.

The SACE meets the needs of students, families, higher and further education providers, employers and the community by helping students develop the skills and knowledge needed to succeed, whether they are headed for further education and training, university, an apprenticeship or immediate employment.

The certificate is based on two stages of achievement. Stage 1 is normally undertaken in year 11 and Stage 2 is completed in year 12. Students will be able to study a wide range of subjects and courses as part of the SACE.

As part of the SACE students will:

- Receive credits for different forms of education and training (such as academic subjects, learning a trade, TAFE, vocational training and community service) provided they are recognised by the SACE Board.
- Be able to return to their studies at any time in the future to complete the SACE without losing credit for work already undertaken.
- Have their individual assessment tasks within a subject assessed using performance standards criteria.
- Have 30% of their work in every Stage 2 subject externally assessed. This will be done in various ways including examinations, investigations, practical or performances.

**The requirements to achieve the SACE**

To gain the SACE certificate students must earn 200 credits as per the SACE pattern requirements as shown below. Ten credits are equivalent to one semester or six months study in a particular subject or course.

Compulsory Stage 1 and Stage 2 subjects and courses | Other subjects and courses
The SACE (continued)

The importance of the compulsory subjects is reflected in the requirement that students must achieve a ‘C’ or better at Stage 1 and a ‘C-’ at Stage 2 in those subjects to complete the SACE successfully.

SACE Requirements

**STAGE 1 (YEARS 10 AND 11)**

- **Personal Learning Plan** (compulsory)
  - 10 credits

- **Numeracy** (compulsory)
  - from a range of mathematics subjects and courses
  - 10 credits

- **Literacy** (compulsory)
  - from a range of English subjects and courses
  - 20 credits

**STAGE 2 (YEAR 12)**

- **Research Project** (compulsory)
  - 10 credits

- **Subjects and courses** (compulsory)
  - from a wide range of options
  - 60 credits

- **Subjects and courses**
  - from a wide range of options
  - 90 credits
  (Selected from either Stage 1 or Stage 2)

**TOTAL SACE = 200 CREDITS**

Refer to pages 23 and 24 for the list of subjects to be offered at Stage 1 and Stage 2 at Brighton Secondary School in 2019.

Where do you go for further help?

Visit the SACE Board website at www.sace.sa.edu.au for further information concerning the SACE.

**Students Online**

Students can log into Students Online using their SACE registration number and pin at www.sace.sa.edu.au/students/assessment-and-results/students-online.

Students Online contains information about an individual student’s SACE. It can help students to:

- plan their SACE and consider different subjects and course combinations
- check their progress towards completing the SACE
- access their results.
The following table indicates two examples of SACE completion.

Compulsory Stage 1 and Stage 2 subjects and courses

Other subjects and courses
In order to meet the requirements for SACE Stage 1, students need to select:

- two units from the Literacy Group
- one unit from the Numeracy Group
- seven units from the Choice Subjects Group

Students may choose to do up to two additional units at SACE Stage 1 level by negotiation.

Schools play a vital role in promoting the intellectual, physical, social, emotional, moral, spiritual and aesthetic development and wellbeing of young Australians, and in ensuring the nation’s ongoing economic prosperity and social cohesion.

**Special Advice to year 11 Students**

Year 11 students will be expected to choose a minimum of five subjects (50 credits) in Semester 1 and five subjects (50 credits) in Semester 2 (inclusive of the compulsory literacy and numeracy requirements). Students may choose up to 60 credits per semester plus off-line (not scheduled during the course of the school day, e.g. Peer Leadership) studies if they wish to.

When not engaged in face to face contact with teachers, year 11 students are expected to use their time wisely and efficiently at school. Flexible timetables become a feature of study in the Senior School and students are supported in making effective use of their independent study time.

**Special Advice to year 12 Students**

The school strongly recommends that year 12 students choose four 20 credit Stage 2 subjects plus the Research Project (A or B). This enables students to maximize their options for future pathways and for tertiary entrance.

Some flexibility exists to allow students to choose to study three 20 credit Stage 2 subjects, plus the Research Project (A or B), and one more 10 credit subject in Semester 2. This pattern of study can be selected by negotiation, and may be recommended to support students who are undertaking Negotiated Education Plans, VET or other recognised learning programs.

Every Stage 2 subject will have 30% external assessment, which means an expert from outside the school will assess the student’s work. 70% of the subject’s assessment is school based. These standards will also be checked by an expert panel from outside the school as part of the SACE Board’s quality assurance processes.
University Entrance Requirements for 2019

Selection into university courses is based on both eligibility and rank. Eligibility allows you to be considered for selection; rank determines whether you are competitive enough to be selected.

Eligibility

To be eligible for selection into a university course/program you must:
- qualify for the SACE
- obtain an Australian Tertiary Admission Rank (ATAR)
- meet any prerequisite subject requirements for the course/program.

Competitiveness

Your competitiveness in relation to other applicants is based on your Selection Rank which is made up of your ATAR plus any bonuses for which the university deems you eligible. The ATAR is a rank given to students on a range from 0 to 99.95 and is calculated from your university aggregate.

To obtain a university aggregate and an ATAR you must:
- qualify for the SACE
- comply with the rules regarding Precluded Combinations
- comply with the rules regarding Counting Restrictions
- complete at least 90 credits of study in Tertiary Admissions Subjects (TAS) and Recognised Studies at Stage 2 from a maximum of three attempts which need not be in consecutive years
- of the 90 credits of study a minimum of 60 credits of study must be from 20 credit Tertiary Admissions Subjects (TAS) and a maximum of 20 credits can be Recognised Studies.

* Normally 10 credit subjects do not count towards this requirement but some 10 credit subjects in the same area, when studied in pairs, can substitute for a 20 credit subject eg music subjects

It is vital that students who intend to apply to interstate or international universities contact those institutions directly to check specific enrolment requirements.
Calculating the university aggregate

The university aggregate is calculated from scaled scores and will be a score out of 90. These are numeric measures of your performance in TAS which are derived from your grades, and are reported to you out of 20.0 for 20 credit subjects and out of 10.0 for 10 credit subjects. The score out of 90 is then converted to an ATAR which is a ranking between 0-100.

Please note that if you do not attempt the externally assessed component of a TAS (e.g. an examination or investigation), you will be given a scaled score of 0.0 for that subject.

The university aggregate for 2019 onwards is calculated from the best scaled scores from three 20 credit TAS plus the best outcome from the flexible option, which is the best 30 credits of scaled scores or scaled score equivalents from:

- the scaled score of a 20 credit TAS;
- half the scaled score of 1 or more TAS;
- the scaled score of 1 or more 10 credit TAS;
- scaled score equivalents for Recognised Studies to the value of 10 or the maximum of 20 credits.

Subject to precluded combination and counting restriction rules. Subjects with scaled scores of 0.0 can be used in the calculation of the university aggregate. The subjects used in the calculation can only come from a maximum of three attempts which need not be in consecutive years.

Students and parents/caregivers are advised to check the SATAC (South Australian Tertiary Admissions Centre) guide or at the SATAC website (www.satac.edu.au) for details of pre-requisite requirements, assumed knowledge, precluded combinations of subjects, counting restrictions and further details of application procedures.

Tertiary institutions provide their own information about their courses and selection requirements via their own websites, as well as open days in term 3.

TAFE Entry Requirements

Completion of the SACE can meet the Course Admission Requirements for most of TAFE SA's courses.

TAFE also considers a variety of other qualifications in its entry and selection processes.

For further details go to the TAFE SA website (www.tafesa.edu.au)
Cross Disciplinary is a learning area of the SACE which provides flexible learning programs for students. It includes the Personal Learning Plan which is a compulsory 10 credit subject in SACE Stage 1 and the Research Project which is a compulsory 10 credit subject in SACE Stage 2. In addition, courses developed under the frameworks of Integrated Learning, Recognised Learning – including VET – can be chosen by students to provide more flexible learning options for study within the school and in the community.

The Personal Learning Plan

**CODE** PLP3Y  **LEVEL** Year 10  **LENGTH** (undertaken in Extended Home Group Lessons)

**CREDITS** 10  **CONTACT PERSON** Jill Brindley

**Year 10** The Personal Learning Plan in year 10 focuses on the inquiry question:

**What are my personal, learning and career goals?**

Students produce an iPortfolio, carry out a career interaction challenge, undertake a SACE course interview and a review of the PLP. The Year 10 component culminates in a folio and reflection that is assessed for SACE accreditation. Student assessment is based on the performance standards:

- Understanding the Capabilities
- Developing Personal and Learning Goals
- Reviewing the Learning

Preliminary work is undertaken in years 8 and 9 Extended Home Group lesson and focus days to contribute toward the PLP. In year 8, the Identity Inquiry and in year 9 the Citizen for Humanity Project provide activities that allow students to demonstrate achievement of the Australian Curriculum capabilities.

**CONTACT PERSON** Vincenzo Andreacchio

**RECOMMENDED BACKGROUND** Nil

**CONTENT**
This subject provides students with opportunities to examine the purpose of research; explore a range of research approaches, and develop their investigative and inquiry skills.

Students explore a range of research practices to develop skills in undertaking research, such as planning their research, developing and analysing their data, and presenting their research findings in a variety of forms.

This subject provides a sound basis for undertaking the SACE Stage 2 Research Project.

**SCHOOL-BASED ASSESSMENT**

**Assessment Type 1: Folio**
Students undertake at least two tasks for the folio. At least one task should focus on ‘Exploring Research Approaches’, and at least one task should focus on ‘Exploring Research Skills’.

**Assessment Type 2: Sources Analysis**
Students undertake at least two sources analysis assessments. They consider the appropriateness, uses, and limitations of sources.

**SPECIAL REQUIREMENTS** Nil

**The Research Project**
The Stage 2 Research Project is a compulsory 10 credit subject undertaken at Stage 2. Students must achieve a C grade or better to complete the subject successfully and gain their SACE.

Students enrol in either Research Project A or Research Project B. Both Research Project A & B may contribute to a student’s Australian Tertiary Admissions Rank (ATAR).

In the first instance, all Brighton Secondary School year 12 students will be enrolled in Research Project B, but are able to change their enrolment to Research Project A by the end of term 1 if they wish.

Students choose a research question that is based on an area of interest to them. They explore and develop one or more capabilities in the context of their research.

The term ‘research’ is used broadly and may include practical or technical investigations, formal research, or exploratory inquiries.

The Research Project provides a valuable opportunity for SACE students to develop and demonstrate skills essential for learning and living in a changing world. It enables students to develop vital planning, research, synthesis, evaluation, and project management skills, through the in-depth exploration of an area of interest.

**EXTERNAL ASSESSMENT**

**Evaluation 30%**
A written summary of 150 words, together with an evaluation of 1500 words. The external assessment for Research Project B must be written.

Back to Contents
Integrated Learning is a framework through which students gain credit for their Cross Curricular Learning. At Brighton Secondary School, the following subjects from the Integrated Learning Framework are offered: Integrated Learning – Peer Leadership, Integrated Learning – Students Mentoring Students, Integrated Learning – Antipodeans Abroad – Integrated Learning – Community Learning.

**Peer Leadership**

**INTEGRATED LEARNING SUBJECT**

**CODE** PRS4S
**LEVEL** Year 11
**LENGTH** Semester
**CREDITS** 10
**CONTACT PERSON** Jan Sutherland

**RECOMMENDED BACKGROUND**

Enrolment in this course is by application following two days of training the previous year. Students are selected based on their participation at the training, their written application and their attitude to school, based on Brighton Secondary School Staff recommendation. It is studied off line (not timetabled during the normal school day) on top of the normal SACE Stage 1 course.

This subject is not chosen during the online counselling process.

**CONTENT**

Teams of two to four Peer Leaders are allocated to each year 8 Home Group. Leaders meet with that Home Group during the extended Home Group program throughout first semester. Students have the opportunity to undertake their own personal venture to gain skills in leadership, problem solving, public speaking, organisation and self-confidence. The subject requires commitment to supporting year 8 students transitioning from primary to secondary school as well as other written, practical and oral tasks designed to enhance personal development.

Students demonstrate leadership by:
- attending day one of the 2019 school year to work with year 8 students and Home Group teachers (one day before other year 11 students)
- attending the Woodhouse excursion and Year 8 Standards Day
- negotiating a range of activities involving the year 8 students during first semester.

**ASSESSMENT**

Students demonstrate evidence of learning through school based assessment types:
- Practical Exploration – reflecting on their own learning, self-development and awareness, literacy, critical and creative thinking
- Connections – developing personal and social capability by working cooperatively to plan and deliver activities
- Personal Venture – expanding, reflecting and evaluating self-development and leadership skills

**SPECIAL REQUIREMENTS**

- students attend a single lesson each week
- students attend year 8 extended Home Group and other activity days
- students nominate for training when expressions of interest are called for in term 4 2018. Successful students have this subject added as an extra SACE unit to their year 11 course in 2019.

**CURRICULUM CHARGES** $45

---

**Students Mentoring Students**

**INTEGRATED LEARNING SUBJECT**

**CODE** SMS4S
**LEVEL** Year 11 or 12
**LENGTH** Semester
**CREDITS** 10
**CONTACT PERSON** Jan Sutherland

**RECOMMENDED BACKGROUND**

Enrolment in this course is by application following a half day of training. Students are selected based on their participation in the training, their written application and their attitude to school, based on Brighton Secondary School Staff recommendation. It is studied off line (not timetabled during the normal school day) on top of the normal SACE Stage 1 or 2 course.

This subject is not chosen during the online counselling process.

**CONTENT**

Students work individually one on one with a younger student meeting with them weekly, on a regular basis to coach and help them learn to make their own decisions and find their own solutions developing into healthy, happy, productive, independent and capable people.

Students have the opportunity to undertake their own personal venture to gain skills in communicating, mentoring, leadership, problem solving, organisation and self-development. The subject requires commitment to undertaking training and supporting younger students transitioning successfully from primary to secondary school or from year to year, as well as other written,
practical or oral tasks designed to enhance personal capabilities. Students demonstrate their commitment by:
• attending a half day training session in 2019 and other leadership opportunities as they arise
• organising and attending a regular weekly meeting with their mentee
• negotiating a range of activities or strategies to help support and develop the capabilities of their mentee
• completing a reflection or weekly journal recording their meetings, activities and outcomes

ASSESSMENT
Students demonstrate evidence of learning through school based assessment types:
• Practical Exploration – reflecting on their own learning, self-development and awareness, literacy, critical and creative thinking
• Connections – developing communication literacy, personal and social capability by working cooperatively to plan, deliver and record activities
• Personal Venture – expanding, reflecting and evaluating self-development, leadership and mentoring skills

SPECIAL REQUIREMENTS
• students communicate regularly with the Mentor Teacher/s about what they are doing, any problems encountered and how they are progressing
• students nominate for training when expressions of interest are called for in term 1 or 3, 2019. Successful students have this subject added as an extra SACE unit to their year 11 or 12 course in 2019.

CURRICULUM CHARGES Nil

Antipodeans Abroad

CODE WOC4S
LEVEL Year 10 or 11 Antipodeans Abroad Trip and Assessment Tasks
LENGTH Semester CREDITS 20
CONTACT PERSON Tony Mahar
RECOMMENDED BACKGROUND
Enrolment in this course is dependent on students being involved in Antipodeans Abroad in 2017 and 2018. When involvement in Antipodeans Abroad is confirmed, students will be given the opportunity to enrol in this off line (not timetabled during the normal school day) course. This subject is not chosen as part of the online counselling process. Expressions of interest will be called for in 2019.

CONTENT
The Antipodeans Abroad Program requires students to travel overseas to undertake experiential learning in another culture. The process requires students to work collaboratively to plan and prepare for their travel with the guidance of the Antipodeans Abroad Program staff and school staff. Activities include trekking, camping, a community project, and one week of rest and relaxation. The aim of the expedition is to teach leadership and life skills and expose the students to global, environmental, human rights issues and engagement with Asia.

ASSESSMENT
• practical – participation in preparatory planning and fitness related activities
• group work – collaborative planning skills
• folio / discussion – Research and Evaluation task.

SPECIAL REQUIREMENTS
Involvement in the Antipodeans Abroad Tour

Community Learning

The Community Learning framework is another way in which individual students can gain credit for learning which is based in the community. SACE credits for Community Learning can be achieved in two ways – Community-developed Programs and Self-directed Community Learning.

Community-developed Programs include, for example, the Australian Music Examinations Board, the Duke of Edinburgh’s Award and the SA Country Fire Service. Program details are updated as new information becomes available.

For further information visit the SACE website www.sace.sa.edu.au.

Self-directed Learning is gained through community activities such as coaching a sports team, being the primary carer of a family member, or leading an environmental project in the community.

Students will need to provide evidence of their learning for assessment so that the SACE Board can recognise these other kinds of community learning.

For more information on community learning, visit: https://www.sace.sa.edu.au/learning/community-learning

The Assistant Principal Senior Schooling is the contact person for individually negotiated community based credit arrangements.
VET is education and training that gives skills for particular jobs. In most cases it leads to industry-recognised qualifications.

**What is VET?**

Students are able to count VET qualifications for up to 180 credits towards their SACE. Students can earn 10 SACE credits for every 70 hours of VET successfully completed.

To find out whether the VET will count at Stage 1 or Stage 2 level or to find out more information about VET please check the VET recognition register at [www.sace.sa.edu.au/web/vet](http://www.sace.sa.edu.au/web/vet).

**Why do VET?**

There are significant benefits for students who undertake VET courses. A student can:

- gain credit towards their SACE
- Some completed full qualifications can be used towards ATAR Scores. (Stage 2 units – up to 20 credits).
- gain industry recognised qualifications accredited Australia wide
- gain specific vocational training in a real workplace context
- help students gain future employment
- help students gain entry into related TAFE courses
- help students decide if this is a possible future career pathway.

**What VET is offered at Brighton Secondary School?**

Students are able to undertake VET in a number of ways:

- school subjects that incorporate VET (e.g. Coffee Culture (page 63))
- external VET courses
- Australian School Based Apprenticeships
- Coding for Game Development (page 35).

VET courses are generally offered to year 11 and 12 students with limited offerings for year 10s.

**External VET courses**

External VET courses are run by various Training Organisations outside of the school. These are often partial or full Certificate I, Certificate II or Certificate III courses. There are approximately 40 different courses on offer to students ranging from Building and Construction, Automotive, Hospitality, Tourism, Hair and Beauty, Photography and Child Care.

External VET courses often involve students being out of the school for one day a week. Locations of the courses vary depending on the Training Organisation running the course. Course booklets for external VET courses will be available in term 3.

Costs of the courses will vary depending on the course. It is an expectation that costs are covered by students/parents.

Students who are interested in undertaking a VET course in 2019 will need to indicate this at their course selection in term 3.

It is highly recommended that students intending to undertake External VET courses select Workplace Practices as one of their subjects either at a Stage 1 or Stage 2 level.

**Australian School Based Apprenticeships (ASBAs)**

ASBAs are where students undertake an apprenticeship (part-time) while remaining at school to complete their SACE. How this looks will depend on the ASBA a student is undertaking. As an example a student may spend one day per week in the workplace, one day per week at TAFE and the remaining time at School. If a student has not completed their ASBA by the end of their SACE their contract will convert to full-time to enable completion of the apprenticeship.

Students can start an ASBA at any stage of their SACE studies. For a student to undertake an ASBA there must be a willing employer. ASBAs are advertised through school bulletins and newsletters. Students may also identify their own employer. If any student is interested in an ASBA they need to register their interest with the VET Coordinator.
**Game Development**

**QUALIFICATION**
ICT30115 Certificate III in Information, Digital Media and Technology

**LEVEL** Stage 2

**LENGTH** 2 semesters

**DELIVERY** 1 day per week face-to-face training

**CREDITS** 70 credits at Stage 2

**RTO** Academy of Interactive Entertainment

**LOCATION** Brighton Secondary School

**Pathway**
This is a nationally accredited course aimed at students who are interested in developing skills in industries that require programming, graphic design, advertising, publishing, computing and computer gaming, information design and simulation for the defence/medical/science sectors.

**What will you learn**
- Learn how to create 3D games using the Unity 3D game engine.
- Get an introduction to industry standard tools and techniques for game development.
- Learn C# to script interaction.
- Design game mechanics to create fun gameplay. Use version control to manage projects, and rapid prototyping to create and test games faster.

For further information, please view the course description on the Brighton Secondary School website and/or contact Hayley Reid on 83758268, email hayley.reid@brighton.sa.edu.au

brightonss.sa.edu.au/curriculum/vocational-education-and-training/
These programs offer highly motivated students the opportunity to focus on specific and challenging university curriculum which builds on school based subjects.

**Adelaide University: Headstart Program and Flinders University: Extension Studies Program**

These programs offered through Adelaide University and Flinders University both offer high achieving Year 12 students the opportunity to complete university subjects which count towards:

- SACE
- ATAR
- University credits

Students have the opportunity to begin university studies in pathways of interest and experience university life whilst still undertaking year 12 studies at Brighton Secondary School. These programs offer highly motivated students the opportunity to focus on specific and challenging university curriculum which builds on school based subjects.

The study in both programs not only counts towards SACE, but will also generate a competitive ATAR score. Furthermore, the credits gained will count towards related university degrees.

For further information, please refer to the university websites below:

www.adelaide.edu.au/headstart  
flinders.edu.au/extension

These programs can replace a year 12 subject, however, it is critical that students in year 11 select a full complement of year 12 subjects at subject selection time. Once they have successfully commenced their university program, they can withdraw from a year 12 SACE subject.

For further information, please see Mr Kouwenhoven.
The richness of meaning expressed in the arts serves both to generate intellectual rigour and demonstrate a sense of self worth in individuals and communities. The arts provide a means by which learners can explain, reflect, understand, critique society and imagine better worlds.

The Australian Curriculum

The Arts curriculum for 2019 in years 8-10 is aligned to the Australian Curriculum. Refer to page 13 for more details about the implementation of the Australian Curriculum.

The Arts forms offered are:
- Drama (including Company Bright)
- Media Arts
- Music
- Visual Arts (Including Design and Multi-Media).

The curriculum for The Arts is divided into two strands:
- Making
- Responding

The content structure is organised through two interrelated strands that present a sequence of development of knowledge, understanding and skills.

Making
Learning about and using knowledge, techniques, skills and processes to explore Arts practices and to make arts works.

Responding
Exploring, responding to, analysing and interpreting art works.

The SACE

The Arts curriculum options in Years 11 and 12 are aligned to the SACE requirements.

---

---
The study of drama provides students with the opportunity to acquire and develop experiences in performance and production. Students are also exposed to live theatre as performers, writers, theatre artists and spectators. Students explore a range of cultural, historical and social issues through the dramatic process.

**Company Bright**

- **CODE**: DCB1Y
- **LEVEL**: Years 8, 9, 10
- **LENGTH**: Full Year
- **CONTACT PERSON**: Yasmin Paterson
- **RECOMMENDED BACKGROUND**: Company Bright is a full year subject for those students who have successfully applied to be included and to continue in the program.

**CONTENT**

Inquiry Questions will underpin the topics covered in years 8, 9 and 10 which include:
- Improvisation
- Script Analysis and Performance
- Film Making
- Devising
- Technical Theatre
- Design

**Practical**:

Multiple performance opportunities will provide skills in stagecraft, acting and design through production company models with students able to choose an area to specialise in as they progress through the Company Bright program.

**ASSESSMENT**

Years 8, 9, 10 Knowledge and Understanding, Application, Creativity, Communication, Collaboration and Problem Solving.

**SPECIAL REQUIREMENTS**

The Company Bright course is only available to students who have been accepted into the program through audition.

**CURRICULUM CHARGES**

A fee of $100.00 per year is required to cover theatre ticket and production costs.

---

**Theatre Elements**

- **CODE**: DRA1S
- **LEVEL**: Year 8
- **LENGTH**: Semester
- **CONTACT PERSON**: Yasmin Paterson
- **RECOMMENDED BACKGROUND**: Nil

**CONTENT**

In this subject students will develop basic skills of the elements of drama including improvisation, vocal expression, mime, and movement. In addition to these skills the concept of characterisation will be addressed through the study of body language, physicalisation, script writing, improvisation and the presentation of a group devised play.

All of the above skills and concepts will be further explored through the study of Asia Pacific and Aboriginal and Torres Strait Islander societal contexts and cultures.

Included in the subject will be a number of theory and homework exercises, which will link directly to the topics being studied and allow students to evaluate and respond to the dramatic works of themselves and others. All of the above skills and concepts will be further explored through the study of story telling, ritual, and culture.

**ASSESSMENT**

Students will be assessed in group work, improvisation skills, script devising and writing, as well as major performance tasks and skills in group work and collaboration.

---

**Theatre Magic**

- **CODE**: DRA2S
- **LEVEL**: Year 9
- **LENGTH**: Semester
- **CONTACT PERSON**: Yasmin Paterson
- **RECOMMENDED BACKGROUND**: Nil

**CONTENT**

In this topic students are further challenged to develop their performance skills through problem solving, creativity, and critical thinking. They will build upon skills in improvisation, vocal and physical expression, and extend their understanding of character, relationships, and situations. This knowledge will be demonstrated in a group devised or scripted major performance piece.

**ASSESSMENT**

Students will be assessed in group work, improvisation skills, script devising and writing, as well as major performance tasks.

**SPECIAL REQUIREMENTS**

It is expected that students will participate in excursions to view live performances.

**CURRICULUM CHARGES**

A levy of $20 will apply to cover theatre ticket costs. Students must also expect to perform to audiences outside the Drama class.
### Immersive Theatre

**CODE** DRA3B  
**LEVEL** Year 10  
**LENGTH** Semester  
**CREDITS** 10

**CONTACT PERSON**  
Yasmin Paterson

**RECOMMENDED BACKGROUND**  
Year 9 Drama recommended

**CONTENT**  
Students will explore a range of theatrical styles and genres through the ideas of dramatic innovators and established theatre conventions, including:  
- Physical theatre  
- Commedia Dell’arte  
- Naturalism/Realism  
- Gothic theatre  
- Musical theatre  
- Melodrama  
- Stage fighting and slapstick

Students will adopt a theatre style and present an interpretation of a scene from a well known play.

Students will choose either an on-stage or off-stage role, and participate in a whole class production, working from an existing script. This will be an evening performance and will further student knowledge of theatrical conventions and build on performance and design skills.

**ASSESSMENT**  
Students will be assessed in group work, review writing, reflection writing, as well as major performance tasks.

**SPECIAL REQUIREMENTS**  
It is expected that students will participate in some after-hours rehearsals, and evening performances. Students will also attend excursions to view live theatre.

**CURRICULUM CHARGES**  
A levy of $20 will apply to cover ticket costs and materials. Students must also expect to perform to audiences outside the Drama class.

### Urban Theatre

**CONTACT PERSON**  
Yasmin Paterson

**RECOMMENDED BACKGROUND**  
Year 9 Drama recommended

**CONTENT**  
Students will learn about contemporary Australian theatre and theatrical innovators, with a focus on how young people’s issues and stories are presented on the stage. Through class workshops and investigation, students will explore an aspect of Australian theatre, demonstrating their knowledge in a product of a performance piece, film, or design. Students will work with legendary Australian playwright and Head of Writing at the National Institute of Dramatic Arts, Stephen Sewell, to devise a play which will be presented in an evening performance. Students will also have the opportunity to learn about off-stage roles of theatre production, such as sound, lighting, set design, costume design, and design for the major performance piece.

**ASSESSMENT**  
Students will be assessed in group work, improvisation skills, script devising and review writing, reflection writing as well as major performance tasks.

**SPECIAL REQUIREMENTS**  
It is expected that students will participate in some after-hours rehearsals, and evening performances. Students will also attend excursions to view live theatre.

**CURRICULUM CHARGES**  
A levy of $20 will apply to cover ticket costs to two theatre shows.

**CONTENT**

Investigation and Presentation
As a class, students will investigate a film innovator through in-class analysis and workshops. They will then take on the role of actor or designer, and in groups develop either a film or stage adaptation of an existing script, in the style of the innovator. Students will analyse and evaluate the process and outcome in an Individual Investigation and Presentation.

Performance
Students will be involved in the staging of a production of an existing play-script, to be presented after school hours to a public audience. Students will contribute onstage as actors, or offstage in the roles of other theatre practitioners (i.e. set, sound, lighting, costume design, front-of-house, publicity, make up, multi-media etc).

Folio
- Students produce a production report that reflects on their development and ability to describe, analyse and evaluate their individual and ensemble process and achievements throughout the performance task.
- In order to enable students to expand their knowledge and understanding of drama as a performing art they will review a live theatre performance.

**ASSESSMENT**

Investigation and Presentation 40%
Performance 40%
Folio 20%

**SPECIAL REQUIREMENTS**

It is expected that students will participate in excursions to view live performances (mostly out of school hours).

**CURRICULUM CHARGES**

A levy of $40 will apply to cover ticket costs of two theatre shows.

</tr>
</tbody>
</table>

**CONTENT**

In Drama students participate in the planning, rehearsal, and performance of dramatic work. Students participate in creative problem solving; they generate, analyse, and evaluate ideas. They develop personal interpretations of texts. Students develop their curiosity and imagination, creativity, individuality, self-esteem and confidence.

The syllabus is prescribed by the SACE Board and is made up of four compulsory sections.

The course is based on the four following areas of study:
- Group Analysis and Creative Interpretation
- Review and Reflection
- Interpretative Study
- Presentation of Dramatic Works.

Within these areas of study students will undertake:
- one group presentation
- one report and at least two reviews for the folio
- one interpretative study
- one performance or one presentation

**ASSESSMENT**

Students demonstrate evidence of their learning through the following assessment types:

School-based Assessment:
- Group Presentation 20%
- Folio 30%
- Interpretive Study 20%

External Assessment:
- Performance 30%

**SPECIAL REQUIREMENTS**

Students are expected to attend at least three Sunday rehearsals and numerous after-school rehearsals for the group production. Students are required to attend live performances for review writing. These are out of the normal hours of the school day.

**CURRICULUM CHARGES**

A levy of $80 will apply to cover some of the ticket costs.
The study of media provides a unique opportunity to understand how the media works. In today’s society everyone is faced with ‘media messages’ from TV, films, radio, print and the internet. There is also an increasing reliance upon electronic communication devices and the ethical and moral issues that surround them. All members of society should be able to critically examine both the medium and the message and to articulate their opinions suitably.

### Video Game Design

| CODE       | DV3S    | LEVEL  | Year 10 | LENGTH   | Semester | CONTACT PERSON | Nic Tubb |
|------------|---------|--------|---------|----------|----------|----------------|----------|-------------------------|
| RECOMMENDED BACKGROUND | Nil |
| CONTENT    | This subject focuses on the theory and practical tasks required to design video games. Students will analyse popular and obscure video games to uncover the different elements that create a meaningful gaming experience. These elements can include: images, text, visual style, animation, sound effects, music, gameplay, user interface, and narrative techniques. Students will attempt three introduction tasks: Programming through creating a simple 3D game in Unity, 3D Art through creating a simple 3D textured model in Maya (which can then be 3D printed), and Character/Story Design. |
| In second term, students will choose a speciality: Art, Programming and/or Level Design, form indie game companies and collaboratively design and author a video game (or prototype). Students can also negotiate to work individually and/or specialise in animation, visual effects, music/sound effects, narrative and other game industry roles. |
Media Studies

ASSESSMENT
Folio 50%
Major Product 50%

SPECIAL REQUIREMENTS
Headphones and a three button mouse are optional but recommended.

 Students choose three of the following topics to study:
• Images of Youth in Media
• Making of the News
• Advertising
• Careers in Media
• Creating Multimedia Texts
• Representations in Media
• Media Audiences
• Media and Leisure
• Media and the Global Community

Or topics negotiated with the teacher.

This course emphasises experimental and solo film making in the practical (product) component.
Music has the capacity to engage, inspire and enrich all students, exciting the imagination and encouraging students to reach their creative and expressive potential. As students progress through studying music, they learn to value and appreciate the power of music to transform the heart, soul, mind and spirit of the individual.

Students enrolling in year 8 Core Music do not require any prior experience on a musical instrument. All Core Music students must study a band or string instrument. Beginners wishing to study percussion will need to audition as places are limited. Continuing guitar, piano and voice students will be assisted by music staff in choosing a second instrument in order to participate in ensemble lessons. Most instruments are available for hire through the school for $170 per year. Other associated expenses may include tutor books, solo pieces, reeds, valve oil, etc.

Music Experience students may be given the opportunity via an interview to proceed to the Core Music course in year 9. Year 8 Core Music students may audition for entry into the Special Interest Music program for year 9 after successful completion of year 8 Core Music and an interview/audition.

In year 11 and 12 (Stage 1 and Stage 2), students may choose from a variety of SACE theoretical and practical course options.

The requirements of the Australian Curriculum are met in year 8-10 Core Music. The Special Interest Music program allows students to explore concepts in greater depth while refining performance skills. In keeping with an inquiry approach to learning, all students in years 8-10 work within the framework of a “Big Idea” and “Guiding Question”.

CONTACT PERSON Yasmin Paterson
RECOMMENDED BACKGROUND Nil

CONTENT
Students study and develop key skills and concepts in the development of visual art and design projects. Amongst these are Pattern, Perspective and Movement in art and design. Art and design processes may include lino printmaking, drawing, digital image processes, sculpture (modelling with clay), construction and painting. Projects are linked to art and design artists, art movements and cultures. These may include Studies of Asia, Aboriginal and Torres Strait Islander Art and Western Art. Students will be introduced to concepts of sustainability in art.

ASSESSMENT
Students will be assessed through a variety of making (practical) and responding (written and / or oral tasks) through the semester.

SPECIAL REQUIREMENTS Nil

Art and Ideas

CODE ART3A
LEVEL Year 10
LENGTH Semester
CONTACT PERSON Yasmin Paterson
RECOMMENDED BACKGROUND Nil

CONTENT
Students explore art concepts through problem solving and higher order thinking strategies. Projects will be created using a series of problem solving tasks that build a folio. Creative products take the form of drawing, painting, printmaking, digital productions, sculpture and installations. Students study the works of key visual artists and their works through critical analysis. These studies are related to key art movements, societies and cultures of Western and Eastern Art.

ASSESSMENT
Students will be assessed through a variety of making (practical) and responding (written and / or oral tasks) through the semester.

SPECIAL REQUIREMENTS Nil

CURRICULUM CHARGES $20 per semester

Art in a Global Community

CODE ART3B
LEVEL Year 10
LENGTH Semester
CONTACT PERSON Yasmin Paterson
RECOMMENDED BACKGROUND Nil

CONTENT
Students will develop visual arts products through investigations of a culture or society in past and present societies (for example South – Asian Art, Indigenous cultures, consumerism in society). One to two major projects will be completed through the semester (Folio and Product). Related tasks include the critical analysis of art works and student responses to the studied culture and society. Students have the opportunity to produce work in a variety of two dimensional and three dimensional media (e.g. drawing, painting, printmaking, sculpture and digital images).

ASSESSMENT
Students will be assessed through a variety of making (practical) and responding (written and / or oral tasks) through the semester.

SPECIAL REQUIREMENTS Nil

CURRICULUM CHARGES $20 per semester
Graphic Design

**CODE** DES3A  
**LEVEL** Year 10  
**LENGTH** Semester  
**CONTACT PERSON** Yasmin Paterson  
**RECOMMENDED BACKGROUND** Nil

**CONTENT**  
Graphic Design is visual communication through a skilful combination of text and images such as in logos, advertisements, magazines, books and web pages. Students will explore Elements of Composition and Typography through a series of written and practical tasks that develop an understanding of the elements and principles of design. Students will learn digital and hand drawn techniques to implement these elements and principles in compositions. These skills are then used in the development of a folio using the design process to resolve a graphic design brief and produce and evaluate a final product.

**ASSESSMENT**  
Students will be assessed through a variety of making (practical) and responding (written and / or oral tasks) through the semester.

**SPECIAL REQUIREMENTS** Nil

**CURRICULUM CHARGES** $20 per semester

**CONTENT**

This course is designed to introduce students to the traditional and contemporary skills and practices of manufacturing. Students will explore and experiment with a variety of practices to create wearable artistic jewellery. Material such as metals, glass, wood, leather, felt, recycled objects and paper will be incorporated with sawing, cutting, stamping, riveting, soldering and fusing techniques. These will be combined with art processes for example printmaking, paper quilling and painting to create various products; earrings, bracelets, brooches and necklaces. Students will be given opportunities to explore local arts industries (e.g. The Jam Factory) including visits by guest speakers and excursions.

**CONTENT**

Through a Visual Study, students will undertake a series of practical and written tasks to learn skills and develop an understanding on the range of practices used by digital artists, both 2D and 3D. A combination of hand made and digital skills will be used. Students will also explore how artists communicate their ideas through their work.

These skills are then used in the development of a folio, in which students need to deeply explore a concept and experiment with the most appropriate techniques to present this concept visually as a work of digital art.

**CODE** VAA4A  
**LEVEL** Stage 1  
**LENGTH** Semester  
**CREDITS** 10  
**CONTACT PERSON** Yasmin Paterson  
**RECOMMENDED BACKGROUND** Nil  

**CONTENT**  
Students study the environment as a central theme, exploring their world, issues and traditions from a variety of social and cultural contexts. Artists and visual arts works on an environmental theme are critically analysed. Students may choose to work in a variety of expressive forms. These include drawing, painting, installation, sculpture and printmaking. Students complete one visual study, one folio and a product during the semester. Students will develop a visual study on the methods and materials of environmental artists. The folio allows students the ability to develop more personal responses to the environmental theme. Final resolutions will be developed into a major work.

Visual Arts (continued)

### Visual Arts – Art Focus

- **CODE**: VAA5E
- **LEVEL**: Stage 2
- **LENGTH**: Full year
- **CREDITS**: 20
- **CONTACT PERSON**: Yasmin Paterson
- **RECOMMENDED BACKGROUND**: An interest in the Visual Arts and / or Stage 1 Visual Art or Design.

**CONTENT**

In Visual Arts students express ideas through practical work using drawings, sketches, diagrams, models, prototypes, photographs and / or audio visual techniques leading to resolved pieces. Students have opportunities to research, understand and reflect upon visual art works in their cultural and historical contexts.

The broad area of Art includes both artistic and crafting methods and outcomes, including the development of ideas, research, analysis and experimentation with media and techniques, resolution and production.

These areas of study are covered: Visual Thinking, Practical Resolution, Visual Arts in Context. At the conclusion of their course, students participate in a major exhibition of their work.

**ASSESSMENT**

School-based Assessment:
- Folio 40%
- Practical 30%
  (two products supported by Practitioners’ Statements)

External Assessment:
- Visual Study 30%

**SPECIAL REQUIREMENTS**: Nil

**CURRICULUM CHARGES**: $40 per year

### Visual Arts – Design Focus

- **CODE**: VAD5E
- **LEVEL**: Stage 2
- **LENGTH**: Full year
- **CREDITS**: 20
- **CONTACT PERSON**: Cheryl Evans
- **RECOMMENDED BACKGROUND**: An interest in Design and / or Stage 1 Design.

**CONTENT**

In Visual Arts Design Focus students express ideas through practical work using drawings, sketches, diagrams, models, prototypes, photographs and /or audio visual techniques leading to resolved pieces. Students have opportunities to research, understand and reflect upon design works in their cultural and historical contexts.

The broad area of Design includes graphic and communication design, environmental design and product design. It emphasises defining the problem, problem solving approaches, the generation of solutions and / or concepts and the skills to communicate resolutions.

The three areas of study covered are: Visual Thinking, Practical Resolution, Visual Arts in Context. At the conclusion of the course students participate in a major exhibition of their works.

**ASSESSMENT**

School-based Assessment:
- Folio 40%
- Practical 30%
  (two products supported by Practitioners’ Statements)

External Assessment:
- Visual Study 30%

**SPECIAL REQUIREMENTS**: Nil

**CURRICULUM CHARGES**: $40 per year
The Senior content of the technology curriculum is divided into four strands:

**Investigating**
Students:
- develop ideas and create imaginative solutions for the learning tasks they are working on
- investigate issues and needs
- create proposals and alternatives
- produce processes and products and evaluate consequences and outcomes
- listen to and consider others’ opinions of their work.

**Planning**
Students:
- research topics (e.g. find pictures, models, descriptions and information)
- present information in their own words and in a variety of ways
- use a range of information tools including computers, tape recorders, videos and printed material.

**Producing**
Students:
- make, form, shape and join a variety of materials
- gain an understanding of the types, variety and properties of materials; e.g. clay, paper, card, plastic, fabric, metal
- learn to use a range of tools safely.

**Evaluating**
- evaluating how well the design brief has been met
- reflecting on the effectiveness of products
- possible modifications to improve ideas or procedures
- impact of technological practices on individuals and society and / or the individual

The years 8 to 10 Technologies curriculum is aligned to the Australian Curriculum. There are two strands: Design Technologies and Digital Technologies.
Chefs in Action

**CODE** HEC1A  
**LEVEL** Year 8  
**LENGTH** Semester  
**CONTACT PERSON** Andrew Hudson  
**RECOMMENDED BACKGROUND** Nil  

**CONTENT**

This course introduces students to kitchen safety, hygiene, food technology and nutrition. They will use the design process to create their own healthy wrap in the “Wrap it Up” Task. Students use the dietary guidelines to prepare dishes to encourage healthy food choices and develop food preparation skills.

**ASSESSMENT**

Students will be assessed in line with the Australian Curriculum Achievement Standards for Design and Technology.

**SPECIAL REQUIREMENTS** Nil

Design It – Make It – Race It

**CODE** TST1B  
**LEVEL** Year 8  
**LENGTH** Semester  
**CONTACT PERSON** Patrick Mackay  
**RECOMMENDED BACKGROUND** Nil  

**CONTENT**

Students will use and experience a range of materials and systems to study and design solar powered products and the making of a CO2 dragster. This is designed for students who have had little experience in Technology and for all to enjoy and learn.

**ASSESSMENT**

All students will be required to present work in a folio format, with the teaching and learning emphasis on the design process: investigating, planning, producing and evaluating. The strands of Technologies knowledge and understanding and Technologies processes and production skills will be used for the basis of all assessment.

Majority of assessments will be practical tasks, with supporting theoretical work.

**SPECIAL REQUIREMENTS** Nil

Food in Action

CODE  HEC2A
LEVEL  Year 9
LENGTH  Semester
CONTACT PERSON  Andrew Hudson
RECOMMENDED BACKGROUND  An interest in food technology and nutrition.

CONTENT
Students will develop an understanding of the importance of a variety of food, sound nutrition principles and food preparation skills in order to make better food decisions for their future. The Australian Guide to Healthy eating is used to analyse food choices.

ASSESSMENT
Students will be assessed in line with the Australian Curriculum Achievement Standards for Design and Technology and Health and Physical Education.

SPECIAL REQUIREMENTS  Nil

Material Production Practices

CODE  TST2B
LEVEL  Year 9
LENGTH  Semester
CONTACT PERSON  Andrew Hudson
RECOMMENDED BACKGROUND  Nil

CONTENT
Students will learn and use creative design methods to produce products using traditional construction techniques as well as contemporary Computer Aided Manufacturing processes. This project based learning will give students experience in working with varied materials, such as Metals, Timbers and Plastics. Computer Aided Design software will be integrated into the design process with students having the opportunity to model and prototype their products.

ASSESSMENT
All students will be required to present work in a folio format, with the teaching and learning emphasis on the design process: investigating, planning, producing and evaluating.

The strands of Technologies knowledge and understanding and Technologies processes and production skills will be used for the basis of all assessment.

Majority of assessments will be practical tasks, with supporting theoretical work.

SPECIAL REQUIREMENTS  Nil

Sew Make Create

CODE  HEC2B
LEVEL  Year 9
LENGTH  Semester
CONTACT PERSON  Marie Elley
RECOMMENDED BACKGROUND  An interest in fashion, design and construction.

CONTENT
Students will develop their design and construction skills whilst completing two projects which include a cushion and tee shirt / singlet top.

Students will also have an opportunity to:
• use Coverlock and Overlock machines
• design their own fabrics using sharpees, applique and transfers
• investigate fabric construction and properties

ASSESSMENT
Students will be assessed in line with the Australian Curriculum Achievement Standards for Design and Technology.

SPECIAL REQUIREMENTS  Nil
### STEM F1 in Schools
**Code:** FOS2S  
**Level:** Year 9  
**Length:** Semester  
**Contact Person:** Andrew Hudson  
**Recommended Background:** Nil

**Content:** This is a STEM (Science, Technology, Engineering and Mathematics) program. It provides an exciting opportunity for students to design, analyse, test, manufacture and race a prototype F1 vehicle combining all of the above disciplines. In addition, each student will have the opportunity to use exciting contemporary 3D printing technology to manufacture part of their vehicle. They will use Industry standard 3D modelling software that will be used to design the car and to create a tool path for its manufacture. A range of software to help test the product’s aerodynamic properties, will be used. Success in this course will lead to opportunities to compete in the biggest engineering competition in the world.

**Assessment:** Majority of assessments will be practical tasks with supporting theoretical work.

**Special Requirements:** Nil  
**Curriculum Charges:** $15

### Sustainable Design
**Code:** TST2A  
**Level:** Year 9  
**Length:** Semester  
**Contact Person:** Andrew Hudson  
**Recommended Background:** Nil

**Content:** Students will create two projects based on their investigation of sustainable technology in the form of an Eco Desk Lamp and a student Negotiated Project. Students will use a variety of materials, including timber, extruded aluminium, foam core board, core flute and electronic components. Students will also combine CAD and CAM as part of the process to assist in making the project.

**Assessment:** All students will be required to present work in a folio format, with the teaching and learning emphasis on the design process: investigating, planning, producing and evaluating. The strands of Technologies knowledge and understanding and Technologies processes and production skills will be used for the basis of all assessment. Majority of assessments will be practical tasks, with supporting theoretical work.

**Special Requirements:** Nil  
**Curriculum Charges:** $20

### Business Awareness
**Code:** BAW3S  
**Level:** Year 10  
**Length:** Semester  
**Contact Person:** Rod Grant  
**Recommended Background:** Nil

**Content:** In this course students are given the opportunity to further develop their understanding of business and economic concepts by considering Australia’s economic performance and standard of living. Through contemporary issues, events and case studies students learn and investigate how governments, business and individuals respond to changing economic conditions.

**Course Structure:**
- Circular flow of income
- Role of Government in the economy
- Impact of technology on business
- Setting up a small business
- Marketing plan

**Assessment:** Students will be assessed through a range of modes including assignments, research reports and a major investigation. Assessment will be based on Theory, Attitude and Practical components.

**Special Requirements:** Nil  
**Curriculum Charges:** $20

**CONTENT**

Students will examine safe food handling practices and the factors that influence meal planning. They apply this knowledge through the preparation and presentation of dishes for a range of occasions. Students will have the opportunity, individually or in groups, to investigate, plan and prepare dishes for selected occasions.

Practical tasks are selected to reinforce content and extend students’ food preparation skills.

**ASSESSMENT**

Students will be assessed in line with the Australian Curriculum Achievement Standards for Design and Technology.

**SPECIAL REQUIREMENTS**

Students may have to supply special ingredients if required.

**CURRICULUM CHARGES** $50

**CONTENT**

This subject examines and implements the Design Process. Students will extend their clothing construction skills through the construction of a bag and a skirt or shorts.

Students will investigate:

- Cultural designs
- How to use commercial patterns
- The impact of technology on fabric and product design
- Designing using recycled materials

**ASSESSMENT**

Students will be assessed in line with the Australian Curriculum Achievement Standards for Design and Technology.

**SPECIAL REQUIREMENTS**

Students are responsible for purchasing the fabric and notion requirements for their clothing garment.

**CURRICULUM CHARGES** $20

<td>Year 10</td>
<td>Andrew Hudson and Peter Vowles</td>
<td>Nil</td>
<td>This course is offered to students as a choice within the compulsory Health and PE subject area of the Australian Curriculum. There are no pre-requisites, however students would be expected to have an interest in further developing skills and knowledge in the area of nutrition and healthy food preparation, safety and the health benefits of a variety of physical activities.</td>
<td>Students focus on the areas of: 1. Food and nutrition 2. Health benefits of physical activity 3. Safety Students will: • investigate food groups and nutritional recommendations for healthy eating in order to develop their own strategies for eating a healthy balanced diet. Practical skills will include designing and making healthy meals and snacks. • analyse the value of lifelong physical activities for personal and community health and wellbeing. • investigate and promote community resources and facilities which have a positive influence on the health, safety and wellbeing of the community.</td>
<td>Students will be assessed in line with the Australian Curriculum Achievement Standards for Health and Physical Education.</td>

<td>Nil</td>
<td>This is a wonderful opportunity to experience the exciting and challenging environment of Computer Aided Design and Computer Aided Manufacture, mixed into the new STEM F1 in Schools worldwide engineering competition. Students who have had experience in this subject will be extended significantly, whilst those studying for the first time will benefit from self paced interactive learning tools to help with the technology. Students will also have a fascinating and unique opportunity to use a contemporary 3D printer as part of their design tools. Students will use CATIA software to design, test, analyse, and ultimately manufacture a prototype F1 vehicle, whilst the team environment will encourage business and enterprise skills to be learnt and applied. Of course, the finished products are raced. The software, CATIA, is an industry standard program, used by Boeing and other leading manufacturers. Currently we are one of two schools in SA, with access to it. Students will use Computational Fluid Dynamic testing software (Virtual Wind Tunnel) to validate the aerodynamic features of their vehicles. Smoke Tunnel testing is also included, as is the use of an actual wind tunnel to test vehicles post manufacture. Success in this course can lead to State, National and Global F1 in School Competitions.</td>

Accounting

**CODE** ACG4S  
**LEVEL** Stage 1  
**LENGTH** Semester  
**CREDITS** 10  
**CONTACT PERSON** Michelle Anderson  
**RECOMMENDED BACKGROUND** Nil  

**CONTENT**  
Stage 1 Accounting gives students practical skills and knowledge in managing financial information for a business (including the use of ICT). Topics may include:  
- The Environment of Accounting  
- Personal Financial Management  
- Business Documents  
- Keeping Cash Records  
- Double-entry Recording  
- Financial Reports  
- Analysis and Interpretation of Financial Reports.  

Tasks students undertake during this course include:  
- Transaction analysis  
- Journals  
- Recording Financial Transactions in Ledger Accounts  
- Financial Reports  
- Personal Records  

**ASSESSMENT**  
Skills and Application Task 70%  
Investigation 30%  

**SPECIAL REQUIREMENTS** Nil
### Advanced Timber Manufacturing

**CODE** WTE4A  
**LEVEL** Stage 1  
**LENGTH** Semester  
**CREDITS** 10  
**CONTACT PERSON** Patrick Mackay/Andrew Hudson  
**RECOMMENDED BACKGROUND** Nil

**CONTENT**
Students would have the opportunity to engage in contemporary timber manufacturing techniques. These techniques could include, but not limited to, CAD skills (Digital Technologies), the use of alternative materials combined with timber (resin/metal/glass), timber manipulation (bending and shaping), laser cutting and engraving, and hopefully working with a CNC flatbed router to create products that align with the current traditional and creative timber manufacturing industry.

**Skills Tasks**
The semester would consist of students working through a series of skills tasks to explore a variety of techniques. They would also engage in a material application task where students would investigate and test materials used in these contemporary manufacturing processes.

**Folio**
Once skills have been obtained, students would follow the design process to plan and make a individualised product for manufacturing, through the folio task. Students investigate the information that they need to know, then plan how they could create the product by making decisions based on this process. Once the product is complete, students evaluate the successfulness of their product and its design, along with the processes they used to create it.

**Major Product**
The final assessment task is the Major Product. This is where the students create their design ideas using the skills obtained and the process followed throughout the folio.

### Business and Enterprise

**CODE** BUE4S  
**LEVEL** Stage 1  
**LENGTH** Semester  
**CREDITS** 10  
**CONTACT PERSON** Kym Anderson  
**RECOMMENDED BACKGROUND** Nil

**CONTENT**
Students will study one of the following core topics:
- Introduction to Business and Enterprise
- Business Enterprise in Practice

Students will also undertake a study of two to three option topics:
- Establishing a Business
- Business Plans
- Business Management and Communication
- Financial Planning and Marketing
- Technology for Business
- Marketing
- Employment Relations
- Entrepreneurship: The Enterprising Person
- Global Business
- Taxation
- Sharemarket

**ASSESSMENT**
Each assessment component will have a weighting of at least 20%.

- Folio
- Practical
- Issues Study

**SPECIAL REQUIREMENTS**
Students will access businesses in the community to complete some tasks.

---

### CAD / Advanced Technologies / STEM

**CODE** CAD4S  
**LEVEL** Stage 1  
**LENGTH** Semester  
**CREDITS** 10  
**CONTACT PERSON** Andrew Hudson  
**RECOMMENDED BACKGROUND** Nil

**CONTENT**
An exciting, state of the art course, where students will use Industry standard 3D modelling package, CATIA (used by Boeing and many other industry leaders. We are the only school in SA doing so), to develop solutions to a number of sequential exercises. We will use 3D printing to audience their work. No experience is needed. Drawing convention will be also taught.

Students will use the Computer Controlled equipment to design, draw and make an article using the CAD/CAM (Computer Aided Design/Computer Aided Machining) process. This closely mirrors industrial practice. The drawings will be printed to a set format and held in the student's portfolio.

**Skills Tasks**
- Computer Aided Drawing
- Computer Aided Manufacturing
- Rapid Prototyping (3D Printing)

**Folio**
Documenting stages in investigation, planning and evaluation of a major product in response to a Design Brief.

**Major Product**
Produce a major product and document stages of production.

**ASSESSMENT**

- Skills 20%  
- Folio 30%  
- Major Product 50%

**SPECIAL REQUIREMENTS**

RECOMMENDED BACKGROUND Nil

CONTENT
This course focuses on the design and production of a voltage regulator to power SV circuits. It is also intended that there be introduction to the use and programming of micro controllers using the PICAXE Simon Says game.

The revision of basic electronic principles and components:
• Basic units and Ohm's Law
• Using meters and measurements
• Resistor colour code
• Reading circuit diagrams
• Resistors – fixed, variable
• Diodes, light emitting diodes
• Capacitors
• Transistors, ICs

Practical aspects of project construction:
• Making of printed circuit boards for projects
• Design and production of a voltage regulator
• Construction of the Simon Says game
• Introductory PICAXE microcontroller programming

Using computers to:
• Simulate circuit action
• Design printed circuit board layouts.

Skills Tasks
• Construction of the Simon Says game
• Voltage regulator
• Programming Simon Says game

Folio
Documenting stages in investigation, planning and evaluation of a major product in response to a Design Brief.

Major Product
Design and produce a voltage regulator.

CREDITS 10 each
CONTACT PERSON Nima Valamanesh
RECOMMENDED BACKGROUND Year 10 Design Technology subjects

CONTENT
This subject allows students to design an individualised product, made from any chosen production methods or materials. Students can choose this subject for both semesters with different material focuses. Students will develop their fundamental understanding of a variety of modern and traditional materials such as metals, plastics, timbers, fibres, electronics and composites. Students will develop skills in contemporary design and manufacturing process and working accurately with workshop tools and machines including CAD, laser cutting, MIG welding. Students will become skilled in marking and measuring and machining with the use of micrometers and vernier callipers, working to tolerances of up to 0.01mm. Possible projects could include such things as small items of furniture, lighting systems, wall hangings, storage solutions and outdoor sculptures etc.

Skills Tasks
• CAD/CAM processes
• Marking out and cutting processes
• Joining processes

Folio
Documenting stages in investigation, planning and evaluation of images and product that demonstrates and showcases techniques in manipulating and effectively using natural light in response to a Design Brief.

Major Product
Documenting stages of production for presenting a series of images to promote the Adelaide Botanical Gardens on Social Media.

ASSESSMENT
Majority of assessments will be practical tasks, with supporting theoretical work.

CREDITS 10
CONTACT PERSON Andrew Hudson
RECOMMENDED BACKGROUND Nil

CONTENT
This subject is a STEM (Science, Technology, Engineering and Mathematics) course, and one where students will have the opportunity to work in small teams to design, test, analyse and construct a prototype submarine. It is intended that the vessel will be Radio controlled, be able to submerge, surface and navigate through a body of water (swimming pool).

Significant use of computational fluid dynamic software will be used to help design the best possible hull designs, and 3D printing will play a major role in the construction and prototype designing of the sub hull and infrastructure. Clearly, the principles of flotation, buoyancy and gravity will be studied in this course. We have a very supportive working relationship with the Australian Submarine Corporation.

ASSESSMENT

Wood Carcass Construction

CODE WTE4B   LEVEL Stage 1
LENGTH Semester
CREDITS 10
CONTACT PERSON Patrick Mackay
RECOMMENDED BACKGROUND Nil

CONTENT
Students will:
• Work with traditional carcass construction methods (box type construction).
• Be involved in material selection, material preparation, machine jointing and some experimental jointing exercises.
• Be required to design and construct a major furniture item involving traditional carcass construction methods e.g. a bedside cabinet, book shelf, CD/DVD rack or similar.
• Use and experience a range of new and traditional materials.
• Work individually and in some group activities.
• Focus on safely using tools and equipment, including a variety of machines, portable power tools and hand tools.
• Examine other key concepts including maintenance of tools and equipment, preparation of cutting lists and project costing.

GRAPHICS: Students will work from given drawings for set tasks and will need to prepare appropriate design and graphic presentations as part of their major project work. Where possible, Computer Aided Drafting and Design will be encouraged.

Skills Tasks
• Safely using a variety of machines, portable power tools, hand tools, equipment and materials associated with Carcass construction
• Jointing exercises

Folio
Documenting stages in investigation, planning and evaluation of a major product in response to a Design Brief.

Major Product
They will be required to design and make a major framed project (bedside cabinet). They will be required to document the stages of production.

ASSESSMENT
Skills 20%
Folio 30%
Major Product 50%

SPECIAL REQUIREMENTS Nil
CURRICULUM CHARGES $45 – Additional costs may be required depending on major project selection.

**CONTENT**

In Workplace Practices students develop knowledge, skills, and understandings of the nature, type, and structure of the workplace. They learn about the changing nature of work, industrial relations, legislation, safe and sustainable workplace practices, and local, national, and global issues in an industry and workplace context. Students can undertake learning in the workplace and develop and reflect on their capabilities, interests, and aspirations. The subject may include the undertaking of Vocational Education and Training (VET) as provided under the Australian Qualifications Framework (AQF). The subject comprises three focus areas of study:

- Industry and Work Knowledge
- Vocational Learning
- Vocational Education and Training

Students undertake two topics from:

- Future Trends in the World of Work
- The Value of Unpaid Work in Society
- Workers Rights and Responsibilities
- Career Planning
- Negotiated Topics

**ASSESSMENT**

Students demonstrate evidence of their learning through three types of assessment:

- Folio
- Performance
- Reflection

### CAD-CAM Design Prototyping

**CODE** GID5E  
**LEVEL** Stage 2  
**LENGTH** Full year  
**CREDITS** 20  
**CONTACT PERSON** Andrew Hudson  
**RECOMMENDED BACKGROUND**  
No previous experience is required. All work is presented at entry level.

**CONTENT**  
This course provides students with the opportunity to become industrial designers, using to design and ultimately manufacture a prototype product. The course leads directly to Advanced Manufacturing at University and TAFE institutions. Students will have the opportunity to audience their work using presentation software (for example, Camtasia Studio, a screen capture program) and the course will culminate with a display of their CAD render drawings and their prototype. Students will engage with other contemporary technologies including Rapid Prototyping and Computer Aided Manufacturing processes, such as three axis machining. A folio of work will be kept for later use by the students.

**ASSESSMENT**  
The assessment will be based on three assessment types:  
- AT#1 Skills and Application Task 20%  
- AT#2 Major and Minor Product 50%  
- AT#3 Folio 30% (Externally assessed)  

**SPECIAL REQUIREMENTS** Nil  
**CURRICULUM CHARGES** $40 for full year

### CAD Architecture Parametric Modelling

**CODE** CAD5E  
**LEVEL** Stage 2  
**LENGTH** Full year  
**CREDITS** 20  
**CONTACT PERSON** Andrew Hudson  
**RECOMMENDED BACKGROUND**  
No previous experience is required. All work is presented at entry level.

**CONTENT**  
This course provides exciting opportunities for students wishing to extend their understanding in the world of Computer Aided Technologies. The software program used is the internationally acclaimed CATIA suite, used by International companies such as Boeing who use the technology to design and manufacture their aircraft. Students will learn about orthogonal drawing practice, and have the opportunity to use the Imagine and Shape technology to produce designed outcomes. Student pathways include Architecture and Graphic Design, as well as the Trades, most of which now have a CAD component in their training. Completed work will be digitally presented for marking. Students will also learn to use high quality rendering to prepare images for assessment. Students will have the opportunity to audience their work using presentation software (for example, Camtasia Studio, a screen capture program) and the course will culminate with a display of their CAD render drawings.

**ASSESSMENT**  
The assessment will be based on three assessment types:  
- AT #1 Skills and Application Task 20%  
- AT #2 Major and Minor Product 50%  
- AT #3 Folio 30% (externally assessed)  

**SPECIAL REQUIREMENTS** Nil  
**CURRICULUM CHARGES** $25

### Electronics/ Electro Technology – Systems Control

**CODE** ELE5E  
**LEVEL** Stage 2  
**LENGTH** Full year  
**CREDITS** 20  
**CONTACT PERSON** David Clift  
**RECOMMENDED BACKGROUND** Nil  

**CONTENT**  
Through a focus on control electronics, this course contains work associated with electronic principles and components. This will prepare students for entry into University or TAFE pathways to Electrical Trades and/or Electro technology studies. Students will work with software to program micro controllers which satisfy the set design criteria. The practical nature of the course will cover the manufacture a project which uses a micro controller to operate a robot.

**ASSESSMENT**  
The assessment will be based on three assessment types:  
- AT #1 Skills and Application Task 20%  
- AT #2 Major and Minor Product 50%  
- AT #3 Folio 30% (externally assessed)  

**SPECIAL REQUIREMENTS** Nil  
**CURRICULUM CHARGES** $60
Fashion Design Studio

Students are responsible for purchasing the fabric and notion requirements for each garment.

CURRICULUM CHARGES
$50 includes all materials and equipment for one practical skills task.

Furniture Construction – Material Products

CODE FURSE
LEVEL Stage 2
LENGTH Full year
CREDITS 20
CONTACT PERSON Patrick Mackay
RECOMMENDED BACKGROUND
No previous experience is required.

CONTENT
This course will cover the following:
• The principles, experimental exercise and practical activities associated with both traditional and contemporary Carcass construction furniture methods.
• Practical and research aspects of workshop safety, material selection, preparation for machining and the use of machine jointing techniques.
• Experimenting with door and drawer construction, hardware selection and fitting, and the use of a variety of surface finishes and techniques.
• Designing and making a major project focussing on carcass construction (using sheet materials) with the inclusion of a drawer and door (minimum)
• Working from given drawings for set tasks, and the use of appropriate graphics as part of the Folio.

Skills and Material Application Tasks
• Carcass Construction using Knock Down Fittings and traditional jointing
• Construction/hinging of a framed door or drawer
• Material testing and analysis

Folio
Documenting stages in investigation, planning and evaluation of a major product in response to a Design Brief.

Major and Minor Product
Students will be required to design and make a major product (an item of furniture) and a minor product (drawer or door). Students will be required to document the stages of production.

ASSESSMENT
The assessment will be based on three assessment types:
AT # 1 Skills and Application Task 20%
AT # 2 Major and Minor Product 50%
AT # 3 Folio 30% (externally assessed)

Information Processing and Publishing

CODE IPRSS
LEVEL Stage 2
LENGTH Semester
CREDITS 10
CONTACT PERSON Michelle Andersen
RECOMMENDED BACKGROUND Nil

CONTENT
Desktop Publishing involves the use of a computer and page-layout and other software to assemble text and graphics electronically for publishing on paper. Tasks may include programs, leaflets, brochures, advertising material, menus and magazines.

ASSESSMENT
School-based Assessment
• Assessment Type 1: Practical Skills (40%) two or three practical skills assessments
• Assessment Type 2: Issues Analysis (30%) one issues analysis assessment

External Assessment
• Assessment Type 3: Product and Documentation (30%) one product and documentation assessment.

SPECIAL REQUIREMENTS
There is a large amount of printing necessary in this course. Students will need to maintain their printing balance at a level that allows them to print in colour.
### Information Processing and Publishing

**CODE** IPR5E  
**LEVEL** Stage 2  
**LENGTH** Full year  
**CREDITS** 20  
**CONTACT PERSON** Michelle Andersen  
**RECOMMENDED BACKGROUND** Nil  

**CONTENT**  
Stage 2 Information Processing and Publishing consists of two focus areas:  
**Desktop Publishing**  
Involves the use of a computer and page-layout program (in particular Adobe InDesign and Photoshop) and other software to assemble text and graphics electronically for publishing on paper. Tasks may include programs, leaflets, brochures, menus, magazines and advertising material.  
**Business Documents**  
Involves the use of computer hardware and software to present and display documents for the purpose of communication. Documents produced are of a business nature. Tasks may include letters, reports, tables, memoranda, forms, agreements, financial statements, newsletters, programs and itineraries.  

**ASSESSMENT**  
School-based Assessment  
- Practical Skills (40%) at least five practical skills assessments  
- Issues Analysis (30%) one issues analysis and one technical and operational understanding assessment  

External Assessment  
- Product and Documentation (30%)  

**SPECIAL REQUIREMENTS**  
There is a large amount of printing necessary in this course. Students will need to maintain their printing balance at a level that allows them to print in colour.  

### Information Technology – Communication Products

**CODE** IFT5E  
**LEVEL** Stage 2  
**LENGTH** Full year  
**CREDITS** 20  
**CONTACT PERSON** Patrick Mackay  
**RECOMMENDED BACKGROUND** Nil  

**CONTENT**  
The subject is based on practical ‘hands on’ learning, using a range of ICT skills. Students will be offered Game Making as a Major Product in this course. Other main applications to be used include animation package, SWISH, CorelDraw9, Dream Weaver/FrontPage, Access, Web Authorising software, U-Lead Studio 7, Power Point and other software linked to e-commerce. PDF files will be made and applied, as well as the construction of databases, with links to web sites. Students will be involved in using presentation software, however, the main focus will be on generating several interactive web sites, and how they are linked to the community. Students will make a CD, containing all of their work.  

**ASSESSMENT**  
The assessment will be based on three assessment types:  
- AT #1 Skills and Application Task 20%  
- AT #2 Major and Minor Product 50%  
- AT #3 Folio 30% (externally assessed)  

**SPECIAL REQUIREMENTS** Nil  

### Metal Fabrication and Technology – Material Products

**CODE** MET5E  
**LEVEL** Stage 2  
**LENGTH** Full year  
**CREDITS** 20  
**CONTACT PERSON** Patrick Mackay  
**RECOMMENDED BACKGROUND** Nil  

**CONTENT**  
No previous experience is required. All work is presented at entry level.  

**ASSESSMENT**  
The assessment will be based on three assessment types:  
- AT #1 Skills and Application Task 20%  
- AT #2 Major and Minor Product 50%  
- AT #3 Folio 30% (externally assessed)  

**SPECIAL REQUIREMENTS** Nil  

**CURRICULUM CHARGES**  
$60 – Additional fees may be required depending on major and minor project selection.

Photography Communication Products

CODE PHO5E  
LEVEL Stage 2  
LENGTH Full year  
CREDITS 20  
CONTACT PERSON Narelle Brennan  
RECOMMENDED BACKGROUND  
Stage 1 Photography highly recommended, but not compulsory.  

CONTENT  
This subject will focus on providing an in depth understanding of the extensive range of equipment, the processes involved with the capture and manipulation of digital SLR images along with the role of Photography in society and industry specifications.

Skills Tasks
• Controlling time  
• Creative photography  
• Materials application  
  (Photographic data)

Folio
Documenting stages in investigation, planning and evaluation of images and products that demonstrates and showcases creative photographic techniques and production of a product in response to a Design Brief.

Major and Minor Product
Documenting stages of production for presenting images suitable for the production of a product.

ASSESSMENT
The assessment will be based on three assessment types:
AT #1 Skills and Application Task 20%  
AT #2 Major and Minor Product 50%  
AT #3 Folio 30%(externally assessed)

SPECIAL REQUIREMENTS Nil

CURRICULUM CHARGES
$50 – Full cost of major/minor product is dependent on the design and is at the expense of the student.

Workplace Practices 1 and 2

CODE WPA5A and WPB5B  
LEVEL Stage 2  
LENGTH 1 semester each (consecutive semesters)  
CREDITS 10 credits per semester  
**Note: Selection of both courses is equivalent to a 20 CREDIT full year, year 12 subject.  
CONTACT PERSON Hayley Reid  
RECOMMENDED BACKGROUND Nil

CONTENT
Students will develop knowledge, skills and understandings of the workplace. They learn about the changing nature of work, workplace laws, safe and sustainable workplace practices and local, national and global issues that relate to the workplace.

Students will undertake learning in the workplace and develop and reflect on their abilities, interests and aspirations. The subject may include the undertaking of vocational education and training (VET) through courses offered outside the school.

The subject comprises three focus areas of study:
• Industry and work knowledge  
• Vocational Learning  
• Vocational Education and Training

ASSESSMENT
Students demonstrate evidence of their learning through three types of assessment:
• Folio – this may include research reports, self marketing activities, job testing, investigations of career pathways  
• Performance – 25 to 30 hours of work placement in each semester (may include part-time work, work experience, VET, volunteer work)  
• Reflection
School-based Assessment 70%  
External Assessment 30%  
Issues task

SPECIAL REQUIREMENTS Nil
The study of English helps create confident communicators, imaginative thinkers and informed citizens.

**The Australian Curriculum and Senior Secondary Curriculum**

The English curriculum in years 8 to 12 is built around the three interrelated strands of Language, Literature and Literacy. Together, the three strands focus on developing students’ knowledge, understanding and skills in listening, reading, viewing, and writing, speaking and creating.

**Language:** Knowing about the English language and how it works.

Students learn about changes in English and the patterned purposes of English usage, including grammar.

**Literature:** Understanding, appreciating, responding to, analysing and creating literary texts.

Texts provide the means for communication. They can be written, spoken, visual, digital or multimodal and are of personal, cultural, social and aesthetic value.

**Literacy:** Expanding the repertoire of the English language. This strand aims to develop students’ ability to interpret and create texts with appropriateness, accuracy, confidence and fluency.

*Intensive Secondary English (ISEC) is available for eligible students.*
English

**Code**: ENG1Y  **Level**: Year 8  
**Length**: Full year  
**Contact Person**: Deborah Smith  
**Recommended Background**: Nil

**Content**
Students will be introduced to the concept of world view and use this as a framework for the study of English. Thinking skills will be explicitly taught through the study of novels, short stories, plays, poems, films, multi-modal texts and other aspects of the ways we speak and write. Students will be given opportunities to improve their writing, speaking, creating, and reading, viewing and listening skills.

**Assessment**
There will be a range of major assessment pieces each term dealing with writing, speaking and creating, and reading, viewing and listening. Other work including grammar and language studies will lead into these major pieces.

**Special Requirements**
It is expected that students will participate in workshops with visiting experts, for example in poetry, public-speaking and / or drama. A levy of $10 will apply.

---

**English**

**Code**: ENG2Y  **Level**: Year 9  
**Length**: Full year  
**Contact Person**: Deborah Smith  
**Recommended Background**: Satisfactory completion of Year 8 English.

**Content**
Students will develop the areas of study from Year 8 with more emphasis on explaining ideas and constructing arguments. Novels, plays, poems, short stories, films and multi-modal texts will be studied.

**Assessment**
There will be a range of major assessment pieces each term dealing with writing, speaking and creating, and reading, viewing and listening. Other work including grammar and language studies will lead into these major pieces.

**Special Requirements**
It is expected that students will participate in workshops with visiting experts, for example in poetry, public-speaking, drama and / or the Shakespeare Festival. A levy of $10 will apply.

---

**English**

**Code**: ENG3Y  **Level**: Year 10  
**Length**: Full year  
**Contact Person**: Deborah Smith  
**Recommended Background**: Satisfactory completion of Year 9 English.

**Content**
Students will read novels, short stories, plays, poems, view films and multi-modal texts, analysing and responding to them in greater depth and detail than in earlier year levels. They will explore dystopian worlds, science fiction, documentaries and Shakespeare’s ‘Romeo and Juliet’.

**Assessment**
There will be a range of major assessment pieces each term dealing with writing, speaking and creating, and reading, viewing and listening. Other work including grammar and language studies will lead into these major pieces.

**Special Requirements**
It is expected that students will participate in workshops with visiting experts, for example in poetry, public-speaking and / or drama. A levy of $10 will apply.

---

**English as an Additional Language (EAL)**

**Code**: EAL1Y EAL2Y EAL3Y  
**Level**: Years 8, 9, 10  
**Length**: Full year  
**Contact Person**: Deborah Smith  
**Recommended Background**: Nil

**Content**
This subject is intended for students for whom English is a Second Language and for other students requiring additional literacy support. Communication skills in spoken and written English for a variety of purposes are emphasised while following the same year level English curriculum.

**Assessment**
There will be a range of major assessment pieces each term dealing with writing, speaking and creating, and reading, viewing and listening. Other work including grammar and language studies will lead into these major pieces.

**Special Requirements**
It is expected that students will participate in workshops with visiting experts, for example in poetry, public-speaking and / or drama. A levy of $10 will apply.
Intensive Secondary English Course (ISEC)

CODE: IMAIN; IPLP; ICTMS; IHEHL

LEVEL: Years 8, 9, 10, 11

LENGTH: 10-40 Weeks

CONTACT PERSON: Lynlee Graham

RECOMMENDED BACKGROUND: Available to full fee-paying international students.

CONTENT:
Students participate in an integrated program to develop and strengthen their skills in using English. Students work with their teachers across the following learning areas:

 - ISEC English/EAL
 - ISEC PLP (Personal Learning Plan)
 - ISEC ICT, Mathematics and Science
 - ISEC Health and Food and Fabrics
 - ISEC Humanities

They use contextually appropriate opportunities to develop and practise the skills they will use in their subsequent learning programs in the mainstream environment, including the appropriate use of Information Technology and the school's one-to-one learning program and Macbook policy. Students also develop an understanding of and become familiar with the Australian style of secondary schooling and gain the confidence and understanding to participate meaningfully in speaking, listening, writing and reading English in a developmental and supportive environment.

The PLP aims to prepare students for their future career pathways by helping them to investigate a range of post-school options.

ASSESSMENT:
Students are actively involved in assessment activities that support further planning and learning and which also familiarise them with the assessment methodologies, expectations and practices used in secondary Australian schools. A "C" grade or better is a requirement of the PLP.

SPECIAL REQUIREMENTS: Nil

Meeting the literacy requirement through Stage 1 English

In order to meet the literacy requirement of the SACE, students must select at least two semesters from the following Stage 1 English subjects: English Literary Studies; English; Writing for Publication; Essential English; or English as an Additional Language.

Students need to achieve a C grade or better in two semesters of English to fulfil the compulsory 20 credit points of the literacy requirement of the SACE.

Stage 1 English

The study of English provides students with a focus for informed and effective participation in education, training, the workplace and their personal environment.

In Stage 1 English students read, view, write and create, listen and speak, and use information and communication technologies in appropriate ways for different purposes.

Students are required to read, view and respond to texts as well as create texts.

English A and B

CODE: ESH4A and ESH4B

LEVEL: Stage 1

CREDITS: 10 or 20

LENGTH: 1 or 2 semesters

CONTACT PERSON: Deborah Smith

RECOMMENDED BACKGROUND: Satisfactory completion of year 10 English.

CONTENT:
Students will analyse and respond to texts studied in class and create their own compositions. At least one assessment will be an oral or multi-modal presentation.

They will also complete an Intertextual Study comparing a minimum of two texts.

Visual texts, novels, short stories, plays and the media will provide lively discussion and the study of relevant issues and themes. Language composition and critical reading skills will be developed.

Students will work in groups as well as independently and they will need to take increasing responsibility for their own learning.

ASSESSMENT:
Students will be assessed in Responding to and Creating Texts and an Intertextual Study. Each assessment type will have a weighting of at least 20%. Students' performance is assessed according to the subject's Performance Standards and reported with grades A-E at the completion of the semester.

This subject will prepare students for Stage 2 English.

SPECIAL REQUIREMENTS:
It is expected that students will participate in workshops with visiting experts, for example in poetry, public-speaking and / or drama. A levy of $10 will apply.
English as an Additional Language (EAL)

**CODE** EAL4A and EAL4B
**LEVEL** Stage 1
**LENGTH** 1 or 2 semesters
**CREDITS** 10 or 20
**CONTACT PERSON** Deborah Smith
**RECOMMENDED BACKGROUND**
This subject is intended for students for whom English is an Additional Language.

**CONTENT**
Students will present four to five assessment tasks. They will respond to, interpret and create oral, multimodal and written texts in a range of genres and situations. They will develop skills and communication strategies in comprehension, language and text analysis.

**ASSESSMENT**
Students will be assessed in Responding to Texts, an Interactive Study and a Language Study. Each area will have a weighting of at least 20%. Students’ performance is assessed according to the subject’s Performance Standards and reported with the grades A-E at the completion of the semester.

This subject will prepare students for Stage 2 EAL and Essential English.

**ELIGIBILITY**
A student for whom English is an Additional Language, and who either has not had more than a total of five years of full-time schooling where the medium of instruction was English, or who has had more than a total of five years of full-time schooling where the medium of instruction was English and whose knowledge of English is restricted.

**SPECIAL REQUIREMENTS**
It is expected that students will participate in workshops with visiting experts, for example in poetry, public-speaking and / or drama. A levy of $10 will apply.

---

English Literary Studies A and B

**CODE** ENS4A and ENS4B
**LEVEL** Stage 1
**LENGTH** 1 or 2 semesters
**CREDITS** 10 or 20
**CONTACT PERSON** Deborah Smith
**RECOMMENDED BACKGROUND**
High achievement in year 10 English.

**CONTENT**
Students will analyse and respond to texts studied in class and create their own compositions. At least one assessment will be an oral or multimodal presentation. They will also complete an Intertextual Study comparing a minimum of two texts. Visual texts, novels, short stories, plays and the media will provide lively discussion and the study of relevant issues and themes. Language composition and critical reading skills will be developed.

Students will work in groups as well as independently and they will need to take increasing responsibility for their own learning.

Students will be expected to read widely, think critically and write analytically.

**ASSESSMENT**
Students will be assessed in Responding to and Creating Texts and an Intertextual Study. Each assessment type will have a weighting of at least 20%. Students’ performance is assessed according to the subject’s Performance Standards and reported with grades A-E at the completion of the semester.

This subject will prepare students for Stage 2 English Literary Studies and English.

---

English Writing for Publication

**CODE** ENJ4S
**LEVEL** Stage 1
**LENGTH** 1 semester
**CREDITS** 10
**CONTACT PERSON** Deborah Smith
**RECOMMENDED BACKGROUND**
Satisfactory completion of year 10 English, in addition to a love of reading and writing and a genuine interest in the world of publication.

**CONTENT**
This one semester course is designed for students who are keen to explore the art of writing in various forms, such as in newspapers, novels and speeches. Students will investigate the craft of writing and production elements. Learning will centre on the power of language, the writing process, and the importance of audience and purpose. Students will respond to and create texts and complete an Intertextual Study. At least one assessment will be an oral or multimodal presentation.

**ASSESSMENT**
Students will be assessed in Responding to and Creating Texts and an Intertextual Study. Each assessment type will have a weighting of at least 20%. Students’ performance is assessed according to the subject’s Performance Standards and reported with grades A-E at the completion of the semester.

This subject will prepare students for Stage 2 English.

**SPECIAL REQUIREMENTS**
It is expected that students will participate in workshops with visiting experts, for example in poetry, public-speaking and / or drama. A levy of $10 will apply.

English Literary Studies

CODE ELS5E
LEVEL Stage 2
LENGTH Full year
CREDITS 20
CONTACT PERSON Deborah Smith
RECOMMENDED BACKGROUND
High achievement in Stage 1 English Studies.

CONTENT
This subject focuses on the skills and strategies of critical thinking needed to interpret texts. Through the shared and individual study of texts, students encounter different opinions about texts, find evidence to support a personal view, learn to construct logical arguments, and consider a range of critical interpretations of texts. Students also analyse the relationship between authors, texts, audiences and contexts and use this learning to produce reasoned critical responses to texts and to create their own.

It consists of Responding to Texts and Creating Texts, a Comparative Text study and an Examination.

• Responding to Texts comprises Shared Studies of:
  – a novel
  – one film text
  – one drama text
  – a study of poetry

• The Creating Text study focuses on:
  – transforming a text into a different text type with an accompanying Writer’s Statement
  – creating a written, oral or multimodal text

• The Text Study is:
  – a comparative text study of two texts
  – a critical reading of short texts

ASSESSMENT
School-based Assessment:
Responding to Texts 50%

SPECIAL REQUIREMENTS Nil
Learning in Health and Physical Education promotes the integration of physical, social, emotional, environmental and spiritual dimensions of living, and includes such areas as Health Education, Physical Education, Food and Fabrics, Outdoor Education and Sport Education.

The Australian Curriculum:
The Health and Physical Education curriculum for 2019 in years 8, 9 and 10 is aligned to the Australian Curriculum requirements.
The content of the health and physical education curriculum is organised into the following strands and substrands.

Strand 1: Personal, Social and Community Health
Substrands:
• Being healthy, safe and active
• Communicating and interacting for health and wellbeing
• Contributing to healthy and active communities

Strand 2: Movement and Physical Activity
Substrands:
• moving our body
• understanding movement
• learning through movement.

The Health and Physical Education Learning Area aims to develop in all students:
• an understanding of the way in which people function physically, socially, emotionally and spiritually as individuals and members of groups
• the ability to make informed decisions about health and wellbeing and how it relates to themselves and their relationships with others
• a positive disposition towards lifelong participation in regular physical activity
• the ability to enhance their own and others’ self-concept
• a wide range of skills which promote healthy active practices
• skills for creating and maintaining positive interactions
• safe and respectful behaviours and responsibility to maintain safe environments
• a commitment to promoting equity, valuing diversity and justice, and establishing supportive learning environments
• an exploration of future work in the health, education and training, food and hospitality, fitness, sport and recreation industries
• an ability to critically reflect on, articulate and challenge social constructs with a view to improving health outcomes for themselves, others and communities
• capacities to apply learning in health and physical education to other Learning Areas, to life in the wider community, virtual community, and in accessing further education and training.

Within our core curriculum we provide opportunities for students to address the general capabilities and cross-curricular priorities as outlined in the Australian Curriculum.

The SACE:
The Health and Physical Education options in years 11 and 12 are aligned to the SACE requirements.

Health and Physical Education (continued)

### Health and Physical Education

**CODE** HPE1A  **LEVEL** Year 8  
**LENGTH** Semester  
**CONTACT PERSON** Peter Vowles  
**RECOMMENDED BACKGROUND**  
If only one semester of Physical Education is chosen, it must be HPE Core.  

**CONTENT**  
This course will provide students with opportunities to learn about and experience aspects of health and physical activity. The focus is on developing skills and improving performance in Games and sports, Fundamental movement skills, Challenge and adventure activities, Active play and minor games, Rhythmic and expressive activities and Lifelong physical activity. Students will also be expected to develop and display personal qualities, attitudes and behaviours consistent with positive outcomes for individuals and groups.

**Practical Topics**  
During double lessons practical topics will be Athletics, Aussie Rules, Softball, Basketball, Indoor Hockey and Indoor Soccer.  
Practical single lessons will be units focusing on Fitness, Minor games and challenges and Dance.

**Health**  
During a single lesson a week students will develop knowledge in order to make informed safe decisions in regards to health related topics including:  
- Alcohol and other drugs  
- Mental health and wellbeing  
- Food and Nutrition  
- Relationships and sexuality  
(based on the SHine program)

**ASSESSMENT**  
- Physical Performance and development  
- Communication, Cooperation and Effort  
- Theory work  
**SPECIAL REQUIREMENTS** Nil

### Physical Education

**CODE** PEL1B  **LEVEL** Year 8  
**LENGTH** Semester  
**CONTACT PERSON** Peter Vowles  
**RECOMMENDED BACKGROUND**  
This subject is a choice for students who are genuinely interested in developing their sporting skills, and will more than likely choose Elective PE the following year.

**CONTENT**  
This course will provide students with opportunities to learn more about a variety of Sports / Activities. The focus of the course will be on developing students’ skills to improve performance. This course has no theory component.

**Practical Topics**  
Cricket, Soccer, Volleyball, International Rules, European Handball, Flag Football, Tennis and Park sports.

**ASSESSMENT**  
- Physical Performance and development  
- Communication, Cooperation and Effort  
**SPECIAL REQUIREMENTS** Nil

### Health and Physical Education

**CODE** HPE2A  **LEVEL** Year 9  
**LENGTH** Semester

If only one semester of Physical Education is chosen, it must be HPE Core.

**CONTENT**  
In this course students will further develop understanding and build on their experiences in health and physical activity. Using a “Sport Education Model”, students will have the opportunity to challenge themselves, adopt organisational and officiating roles, develop leadership and improve performance through the medium of games and sports, fundamental movement skills, active play and minor games. Students will also participate in Rhythmic and expressive activities and Lifelong physical activities.

**Practical Topics**  
During double lessons practical topics will be Lacrosse, Netball, Badminton and Table Tennis. Practical single lessons will be units focusing on Aerobic and Anaerobic Fitness, Minor Games and Rhythmic and Expressive Activities.

**Health**  
During a single lesson a week students will continue to develop knowledge in order to make informed safe decisions in regards to health related topics including:  
- Alcohol and other drugs  
- Mental health and wellbeing  
- Food and Nutrition  
- Relationships and sexuality  
(based on the SHine program)

**ASSESSMENT**  
- Physical Performance and development  
- Communication, Cooperation and Effort  
- Theory Work  
**SPECIAL REQUIREMENTS** $5 to cover Hip Hop sessions.
Health and Physical Education (continued)

**Physical Education**

**CODE** PEL2B  
**LEVEL** Year 9  
**LENGTH** Semester  
**CONTACT PERSON** Peter Vowles  
**RECOMMENDED BACKGROUND**  
This subject is for students who are genuinely interested in developing their sporting skills, and will more than likely choose Physical Education the following year.  

**CONTENT**  
This course is designed to further extend the range of sports / activities that students have covered in the compulsory courses in years 8 and 9. The emphasis is on the development of skills to improve performance. Students will also be expected to develop and display personal qualities, attitudes and behaviours consistent with positive outcomes for individuals and groups. This course has no theory component.  

**Practical Topics**  
Touch, Field Hockey, Softball, Baseball, Ultimate Frisbee, Athletics, Basketball, Australian Rules and Indoor Soccer.  

**ASSESSMENT**  
• Physical Performance and Development  
• Communication, Cooperation and Effort  

**SPECIAL REQUIREMENTS** Nil

---

**Food, Fun and Vitality**

This can be a choice subject, or selected as a HPE Australian Curriculum compulsory subject.  

**CODE** FFV3S  
**LEVEL** Year 10  
**LENGTH** Semester  
**CONTACT PERSON** Andrew Hudson and Peter Vowles  
**RECOMMENDED BACKGROUND**  
This course is offered to students as a choice within the compulsory Health and PE subject area of the Australian Curriculum. There are no pre-requisites, however students would be expected to have an interest in further developing skills and knowledge in the area of nutrition and healthy food preparation, safety and the health benefits of physical activities.  

**CONTENT**  
Students focus on the areas of:  
1. Food and nutrition  
2. Health benefits of physical activity  
3. Safety  
Students will:  
• investigate food groups and nutritional recommendations for healthy eating in order to develop their own strategies for eating a healthy balanced diet. Practical skills will include designing and making healthy meals and snacks.  
• analyse the value of lifelong physical activities for personal and community health and wellbeing.  
• investigate and promote community resources and facilities which have a positive influence on the health, safety and wellbeing of the community.  

**ASSESSMENT**  
• Theory work  
• Practical work  

**SPECIAL REQUIREMENTS** Nil

**CURRICULUM CHARGES**  
Charges associated with the hire of instructors, facilities, equipment and transport are estimated at approximately $90 per student over the semester, but will depend on options selected.

<td>A keen interest in health related issues and willingness to participate in discussions, group and community activities. This subject is a direct pathway into Senior Health.</td>
</tr>
</tbody>
</table>

**Content**

This course assists students to make informed choices about health issues and to develop an understanding of the complexity of factors which affect their health. The health component of the course is based on the SHine program. Participation in lessons aims to improve the students' ability to develop healthy relationships, be confident and happy within themselves and their bodies, and make well-informed and safe decisions in the future. Topics include: respect, importance of physical activity for lifelong health, food allergies and trends, drugs, safe partying, sexuality, diversity, relationships, gender/ power/stereotypes, safer sex/ contraception/sexually transmitted infections, negotiation and decision making.

**Assessment**

Students demonstrate evidence of their learning through the following assessment types:

- Workbook Responses
- Group Activities
- ICT Assignment

**Special Requirements**

Possible excursion costs.

Students should approach the course with a genuine interest in minimal impact camping, aquatic skill development, group work and leadership. Successful achievement of year 9 Physical Education and a positive application to school values is expected.</td>
</tr>
</tbody>
</table>

**Content**

Practical Skills and Application:

- Aquatics skills undertaken during a day at Port Noarlunga Aquatic centre, including pre-camp kayaking skills; a three day, two night, canoeing expedition; Monarto excursion expedition preparation and group dynamics activities; beach and school based recreational and fitness related activities to be determined by teacher expertise, student interest and the availability of facilities.

**Theory Component**

Students will study the following topics related to physical health and wellbeing.

1. Minimal impact camping techniques and risk management
2. First Aid
3. Sustainability and the environment
4. Nutrition and Hydration for physical activity

**Assessment**

- Practical Skills and Application
- Theory

**Special Requirements**

Ability to manage time to make up work missed in other subjects through participation in expeditions and aquatics. Supervised time in class will be provided to aid students to achieve this.

**Curriculum Charges**

Students undertaking this course will incur a fee of $220 to cover the costs of transport, camping and equipment hire for the Canoe Expedition and Aquatics unit.

**LEVEL** Year 10  
**LENGTH** Semester  
**CONTACT PERSON** Peter Vowles  
**RECOMMENDED BACKGROUND** Nil

**CONTENT**
Students will undertake four or five practical units that will be determined by teacher expertise, student interest and the availability of facilities. The double lessons will be spent in the community, where possible. Skill development and improving performance will remain a focus in all practical units. The theory component of this course centres on Health and Fitness issues within sport and the community, Nutritional choices, training principles and discrimination in sport.

Community Based Pracs – choices from: Squash, 8 Ball/Snooker, Lawn Bowls, Fencing, 10 Pin Bowling, Fitness, Dance, Self-defence.

**ASSESSMENT**
- Physical Performance and Development
- Communication, Cooperation and Effort
- Theory work

**SPECIAL REQUIREMENTS**
Charges associated with entry fees, facilities, equipment and transport are estimated at approximately $90 per student over the semester, but will depend on options selected.

### Child Studies Understanding Children

**CODE** CSD4S  
**LEVEL** Stage 1  
**LENGTH** Semester  
**CONTACT PERSON** Ross Service  
**RECOMMENDED BACKGROUND** A genuine interest in young children (0-8 years).

**CONTENT**
Students examine the period of childhood from birth to eight years and issues related to the growth, health and well-being of children. They examine diverse attitudes, values and beliefs about childhood and the care of children.

Students study topics within one or more of the following three areas of study:
- The nature of childhood and the socialisation and development of children
- Children in wider society
- Children, rights and safety

**ASSESSMENT**
Assessment is school based. Students demonstrate evidence of their learning through the following assessment types: Practical Activity, Group Activity and Investigation.

**SPECIAL REQUIREMENTS**
Students will be required to visit the community to collect information and conduct interviews.

**CURRICULUM CHARGES**
$30 to supplement food practicals and resources used in other practical tasks.

### Food and Hospitality – Food and Nutrition for Australians

**CODE** FOH4A  
**LEVEL** Stage 1  
**LENGTH** Semester  
**CONTACT PERSON** Andrew Hudson  
**RECOMMENDED BACKGROUND** A genuine interest in nutritional food preparation within the Food and Hospitality Industry.

**CONTENT**
This subject examines food, health and strategies to promote good health in the Food and Hospitality Industry. Students will independently, or in small groups, plan and prepare dishes.

Studies in this course may include:
- Safe food practices
- Individual dietary needs
- Food packaging
- Catering to promote health

**ASSESSMENT**
Practical Activity, Group Activity and Investigation.

**SPECIAL REQUIREMENTS**
Attendance on excursions.

**CURRICULUM CHARGES**
$50 for specialty ingredients.

- **CREDITS**: 10
- **CONTACT PERSON**: Peter Vowles

#### RECOMMENDED BACKGROUND

A keen interest in the environment and physical activity is expected. Successful completion of year 10 Outdoor Pursuits is desirable.

#### CONTENT

Practical units will include a Surfing camp undertaken over three days and two nights at Robe and mountain biking sessions in the Adelaide Hills. Excursions will also be conducted including stand up paddle boarding (SUP), Mega Adventure high ropes course and coastal environment visits. These will be assessed during class double lessons, as well as expedition preparation and group dynamic activities. School based fitness related activities will include our Weights room and Spin Room, as well as other beach and recreational pursuits to be determined by teacher expertise, student interest and the availability of facilities.

Theory topics will include:
- Weather, Swell and Tides
- Survival
- Mountain bike technique and trail design
- Coastal environment management and Ecosystems
- Nutrition.
- Risk management

#### ASSESSMENT

- Practical Skills and Application 60%
- Theory 40%

#### SPECIAL REQUIREMENTS

- Ability to manage time to make up work missed in other subjects through participation in expeditions and aquatics. Supervised time in class will be provided to aid students to achieve this.

#### CURRICULUM CHARGES

Students undertaking this course will incur a fee of $350 to cover the costs of transport, camping, equipment hire and requirements to participate in activities.

#### RECOMMENDED BACKGROUND

This is a new education course, in line with the SACE curriculum development. Students should have a genuine interest for analysing and learning about their involvement in sport and physical activity. A commitment to participate in physical activity, and reflect on personal learning and development. Successful completion of year 10 PE is expected.

#### CONTENT

Practical units in sports and physical activities will be negotiated, based on student interest and the availability of facilities. Efforts will be made so that students doing both semesters of PE, avoid repeating activities.

#### ASSESSMENT

- **FOCUS AREAS, KEY IDEAS AND ASSESSMENT**
  - "In Movement" 40%
  - **Improvement Analysis**
    - Participate in Sports and Physical Activity to understand and reflect on movement concepts and strategies
    - Apply skill application and biomechanics concepts for practical improvement, by giving and receiving feedback
    - Apply communication and collaborative skills in physical activity
  - "Through Movement" 30%
  - **Physical Activity Investigation**
    - Develop strategies and participate in activities to increase equity in participation
    - Personal influences and attitude to participation
  - "About Movement" 30%
  - **Improvement Analysis**
    - Develop theoretical knowledge to understand and evaluate participation and performance outcomes.
    - muscular skeletal and cardio-respiratory systems
    - chronic adaptations
    - biomechanical principles
    - skill classification and stages of learning
    - factors affecting skill learning

Students must display a genuine interest and enthusiasm for physical activity, and a commitment to continue developing and reflecting on their own and others practical skills. Successful completion of year 10 PE is expected. Experience in playing, training and coaching in a sporting environment would be beneficial.

**CONTENT**

Through the course students will develop skills and knowledge in the planning and implementation of instruction for a range of sports. This will include activities with local primary schools. Students may be involved in the background organisation of Brighton Secondary School sporting events – Swimming Carnival and Standards Day. Students will participate, plan and organise peer sporting sessions. Reflection on planning and delivery of practical sessions as well as investigation of pathways for study and employment in the Sport and Recreation fields will make up the theory component of the course.

**ASSESSMENT**

Practical Exploration 40%
Connections 40%
Personal Venture 20%

**SPECIAL REQUIREMENTS**

Students will possibly incur transport costs associated with travel to local primary schools and facilities.

**CONTENT**

Students critically examine attitudes and values about parenting / caregiving and gain an understanding of the growth and development of children. Students develop a variety of research, management and practical skills. Students focus on topics within the following areas of study:

- Contemporary and Future Issues
- Economic and Environmental Influences
- Political and Legal Influences
- Sociocultural Influences
- Technological Influences

### Health

**CODE** HEH5E  
**LEVEL** Stage 2  
**LENGTH** Full year  
**CREDITS** 20  
**CONTACT PERSON** Peter Vowles / Lori Mulhall  

**RECOMMENDED BACKGROUND**  
A keen interest in health related issues and willingness to participate in discussions, group and community activities.

**CONTENT**  
Students recognise the various factors that shape the behaviour and attitudes of individuals and groups in relation to healthy living, and caring for themselves and the environment. Students develop skills to consider how changing social structures, community values, environmental issues, and new technologies affect the health and well-being of individuals and communities.

For a **10-credit subject (semester)**, it is recommended that students:
- study at least one Core concept  
- undertake one Option study.

For a **20-credit subject (full year)**, it is recommended that students:
- study at least one Core concept  
- undertake three Option studies.

**Core Concepts**  
Health Literacy OR The Social and Economic Determinants of Health

**Option Studies**  
- Sexuality and Health  
- Health and Relationships  
- Risks and Challenges to Health.

**ASSESSMENT**  
The following assessment types enable students to demonstrate their learning in Stage 2 Health:

- **School-based Assessment**  
  - Assessment Type 1: Group Investigation and Presentation 30%  
  - Assessment Type 2: Sources Analysis 20%  
  - Assessment Type 3: Practical Activity 20%

- **External Assessment**  
  - Assessment Type 4: Investigation 30%

For a **10-credit subject (semester)**, it is recommended that students provide evidence of their learning through four or five assessments, including the external assessment component. Students undertake:
- at least one Group Investigation and Presentation  
- at least one Sources Analysis assessment  
- at least one Practical Activity  
- one Investigation.

For a **20-credit subject (full year)**, it is recommended that students provide evidence of their learning through seven to nine assessments, including the external assessment component. Students undertake:
- at least one Group Investigation and Presentation  
- two Sources Analysis Assessments  
- at least two Practical Activities  
- one Investigation.

**SPECIAL REQUIREMENTS**  
Several tasks require practical community based research and a positive commitment to enhancing personal and community health. This subject does have a significant literacy component.

### Outdoor Education

**CODE** OUE5E  
**LEVEL** Stage 2  
**LENGTH** Full year  
**CREDITS** 20  
**CONTACT PERSON** Peter Vowles  

**RECOMMENDED BACKGROUND**  
Successful completion of year 10 Outdoor Pursuits and / or SACE Stage 1 Outdoor Education, or by negotiation with the subject coordinator.

**CONTENT**  
**Outdoor Journeys – Kayaking (Coorong) and Mountain Biking (Flinders Ranges)**  
In this topic, students develop skills in outdoor activities under supervision. Students develop the ecological knowledge to investigate the significance of the natural environments in which outdoor journeys are conducted. Students apply the theory they have learnt to field investigations in natural environments.

**Self-reliant Expedition – Kayaking (Glenelg River)**  
This is the culminating topic for a 20-credit subject. Students conduct, review, and evaluate a self-reliant outdoor expedition. The expedition must be a minimum of three days and involve lightweight travelling under indirect supervision. The role of the teacher is to ensure safety, to observe, and to assess.

**Environmental Studies**  
In this topic, students develop the ecological knowledge to investigate the significance of the natural environments in which outdoor journeys are conducted. Students apply the theory they have learnt to field investigations in natural environments.

**Planning and Management Practices**  
In this topic, students develop skills in planning, organising, and managing the safe conduct of themselves and others in outdoor journeys. They explore the nature of risk, risk assessment, and risk management in the context of outdoor journeys.

**Sustainable Environmental Practices**  
In this topic, students demonstrate their ecological knowledge to investigate the significance of the
natural environments in which outdoor journeys are conducted. Students apply the theory they have learnt to field investigations in natural environments.

Planning and Management Practices
In this topic, students develop skills in planning, organising, and managing the safe conduct of themselves and others in outdoor journeys. They explore the nature of risk, risk assessment, and risk management in the context of outdoor journeys.

Sustainable Environmental Practices
In this topic, students demonstrate their ecological knowledge and interpret the significance of the natural environments in which outdoor journeys are conducted. Field trips allow students to analyse sustainable practices, including indigenous Australian practices, in relation to the natural environment.

Leadership and Planning
In this topic, students learn the skills of planning, management, and leadership needed for the safe conduct of self-reliant outdoor journeys involving lightweight travelling.

Investigation
Students undertake an investigation based on their study of an environmental issue that is related to the group practical or self-reliant practical (20-credit subject only), or to their own experiences of outdoor activities, and present a written report.

ASSESSMENT
School-based Assessment
- Assessment Type 1: Folio 20%
- Assessment Type 2: Group Practical 30%
- Assessment Type 3: Self-reliant expedition 20%

External Assessment
- Assessment Type 4: Investigation 30%

SPECIAL REQUIREMENTS
The ability to manage time and communicate with other teachers in regards to completing work requirements in other subjects around the times of expeditions.

CURRICULUM CHARGES
Students undertaking this full year course will incur a fee of $300 to cover the costs of transport, camping, equipment hire for the two outdoor journeys. There will be an additional cost in term 3 for the self-reliant expedition which is organised by the students (approx $200).

ASSESSMENT
School-based Assessment:
- Practical Skills and Applications 50%
  - Folio: Assignments, mid year exams, tests, Issues Analysis 20%
  - External Assessment: End of Year Exam 30%

SPECIAL REQUIREMENTS Nil

CURRICULUM CHARGES
Students doing this course will incur a fee of $40 for the Aquatics unit, plus any associated transport costs.

Workplace Practices – Elite Sport Pathways

CODE WPSSE LEVEL Stage 2
LENGTH Full year CREDITS 20
CONTACT PERSON Tristan Kouwenhoven

RECOMMENDED BACKGROUND
Students need to be actively pursuing a career into elite sport either as an athlete, support staff or related careers in physiology, sports science, etc. There are no other pre-requisites for study in this subject.

CONTENT
This subject is designed to have students explore the rigours and requirements of a career in a sports related field as well as trends impacting on employment, funding and technological advances in professional sports. The content will be highly specific to elite sport and employment opportunities within the field both nationally and globally. It will focus around job availability, sport funding, the changing nature of the industry and preparing for self-promotion. Students will need to be savvy with IT to manage this course.

ASSESSMENT
Students will be able to demonstrate their learning through four types of assessment:
- Folio – assignments
- Performance – elite sport program or work experience
- Reflection
- Investigation – personal experience

School-based Assessment: 70%
External Assessment: 30%

SPECIAL REQUIREMENTS Nil

Back to Contents
The Special Interest Volleyball program promotes skills, behaviours, attitudes and knowledge that will benefit students in their performance of volleyball and other sporting, academic and vocational pursuits and personal development.

Sue Rodger

**RECOMMENDED BACKGROUND**
Special Interest Volleyball is a full year subject for those students who have successfully applied to be included, and to continue in the program.

**CONTENT**
The following topics will be covered in years 8, 9 and 10:
- SHine Health course (year 8 and year 9)
- Rules and Refereeing – Level 1 and Level 2
- Sports Nutrition
- Body Strength and Conditioning
- National Volleyball Skill Models
- Principles of Training and Coaching
- Sports Injuries and Management
- Goal Setting
- Statistics and Tactics

**Practical:** Volleyball skill development, fitness, team skills, and performance opportunities. In addition other physical activities will be included in the program. This will encourage a broad range of skill development, which will prepare students who elect to study the Stage 2 subject.

**ASSESSMENT**
Year 8, 9 and 10 Skill Development / Communication / Cooperation / Effort / Knowledge.

**SPECIAL REQUIREMENTS**
The Special Interest Volleyball course is only available to students who have been accepted into the SIV Program by meeting all selection criteria.

**CURRICULUM CHARGES**
A fee of $200 per year is required to contribute to equipment and program costs.

**LEVEL**
Stage 1

**LENGTH**
Full year

**CONTACT PERSON**
Sue Rodger

**RECOMMENDED BACKGROUND**
Special Interest Volleyball is a full year subject for those students who have successfully applied to be included in the program. Students must be recommended to continue after year 10 SIV.

**CONTENT**
Students develop an awareness of the context within which they are learning, and are encouraged to contribute to collaborative thinking and ways of working. Students share ideas and informed opinions and extend their social communication skills though contribution to groups, family, and/or community. Students extend their self-awareness, personal identity, and values through collaborative processes that build from peer- and self-assessment. Students make links between their learning and their capabilities. They make meaning from experiences in order to recognise themselves as confident and creative individuals, and critical and evaluative thinkers with the necessary life skills to contribute to society as active and informed citizens.

**ASSESSMENT**
- Practical Exploration (including Volleyball, Beach Volleyball, Aquatics) 40%
- Connections Task 30%
- Personal Venture 30%

**SPECIAL REQUIREMENTS**
Volleyball Stage 1 is a course that is highly recommended for students planning to study year 12 Volleyball.

**CURRICULUM CHARGES**
A fee of $200.00 per year is required to contribute to equipment and program costs.
Physical Education (Volleyball Focus)
Stage 2

(SACE Restrictions do not allow students to study both Volleyball and Physical Education at Stage 2)

CODE VOL5E
LEVEL Stage 2
LENGTH Full year
CREDITS 20
CONTACT PERSON Sue Rodger

RECOMMENDED BACKGROUND
Special Interest Volleyball is a full year subject for those students who have been recommended to continue after successfully completing SIV at Stage 1.

CONTENT
• Practical Skills and Applications
  Three practical units (18 hours each)
  • Volleyball
  • Aquatics
  • The third practical activity will be determined by teacher expertise, student interest and the availability of facilities. (Netball, Squash, Touch)

• Folio
  Students will study the following theory topics and will be subjected to external moderation:
  1. Exercise Physiology and Physical Activity.
     Includes studying the energy sources for physical performance, effects of training on physical performance and physiological factors affecting performance.
  2. The Acquisition of Skills and the Biomechanics of Movement.
     Includes studying how skills are acquired, factors affecting learning, psychological factors affecting performance of physical skills and how a knowledge of biomechanics can improve skilled performance.
  3. Issues Analysis.
     The issues analysis enables students to investigate a chosen issue that is related to physical activity and relevant to local, regional, national, or global communities. Students are expected to analyse critically and interpret their findings and experiences. Discussion with students should emphasise the most appropriate methods of seeking and gathering information and the most effective way of presenting it.

• Examination

ASSESSMENT
School-based Assessment:
Practical Skills and Applications 50%
Theory course work (Assignments and Issues Analysis 20%)

External Assessment:
End of year exam 30%

SPECIAL REQUIREMENTS Nil

CURRICULUM CHARGES
A fee of $200 per year is required to contribute to equipment, aquatics and program costs.

Students doing this course will be required to pay approximately $35-$50 if Squash or Netball are selected as the third practical option.
Using Inquiry based learning and critical thinking, HASS encourages students to examine and delve deeper into issues, ideas and events which have shaped our world. HASS encourages students to critically challenge ideas and assumptions in order to participate positively in our community.

The Australian Curriculum

The Humanities and Social Sciences (HASS) provides a broad understanding of the world in which we live, and how people can participate as active and informed citizens with skills needed for the 21st century.

The Humanities and Social Sciences learning area includes the study of History, Geography, Civics and Citizenship and Economics and Business.

The Humanities and Social Sciences are the study of human behaviour and interactions in social, cultural, environmental, economic and political contexts. The humanities and social sciences have a historical and contemporary focus, from personal to global contexts which take into consideration challenges for the future.

Through studying Humanities and Social Sciences, students develop the ability to reflect, question, think creatively and critically, challenge assumptions, pose informed solutions to solve problems and communicate effectively and make decisions about preferred futures.

Studies in HASS are driven by a number of overarching key ideas:
- Who we are, who came before us, and traditions and values that have shaped societies
- How societies and economies operate and how they are changing over time
- The ways people, places, ideas and events are perceived and connected
- How people exercise their responsibilities.

The HASS curriculum is constantly evolving reflecting changes in the Australian curriculum.

HASS at Brighton Secondary School follows the guidelines of the Australian History and Geography curriculums. HASS is a full year course in year 9 consisting of one semester of History and one semester of Geography. The Australian curriculum Civics and Citizenship requirements are embedded in the Geography and History courses at Brighton Secondary School.

In years 9 and 10 all students undertake one semester of History at each of these year levels and have the option of studying a semester of Geography.

The History Curriculum

History is about the forces, peoples, ideas, movements and events that have shaped our contemporary world. The History curriculum in years 8, 9 and 10 is organised into two main strands these being: Historical Knowledge and Understanding and Historical skills. These two strands define the content of the course and the skills of Historical Inquiry.

At each year level (8-10) the course work revolves around three Depth Studies (topic study areas). The Depth Studies are guided by key Inquiry questions specific to each year level. Each Depth study also has specific links to one or more of the seven general capabilities and the three cross curriculum priorities.

In History the curriculum is guided by key concepts and skills. These are using evidence (primary and secondary), continuity and change, cause and effect, perspectives, empathy, significance and contestability.

The Geography Curriculum

Geography is the study of places, people, the environment and the interactions between these.

In each year level there are broadly two units of study and a major student directed investigation based on inquiry and challenge based approaches to learning.

In year 8 the two units are Landforms and Changing nations.
In year 9 the two units are Biomes and Food Security, and Interconnections.
In year 10 the two units are Environmental Change and management and Wellbeing.

In HASS research and critical inquiry are essential components of the curriculum with all students producing at least ONE piece of work in each of the four key Literacies (Visual, Written, Oral and Multimodal) each semester.

Students will be given the opportunity of working individually and in groups for particular formative and summative assessment tasks as prescribed in the semester assessment plans distributed to students early in each semester.

The SACE

The Humanities and Social Sciences curriculum options in years 11 and 12 are aligned to the SACE requirements.
**HASS History**

**LENGTH** Semester  
**CONTACT PERSON** Jack Kyriakou  
**RECOMMENDED BACKGROUND** Nil  

**CONTENT**  
**History:** Ancient to the Modern World c650CE -1750  
The course focuses on the significant events and issues from the end of the Ancient Period to the beginning of the Modern period and how these events/issues shaped the modern world. A range of societies and civilizations from Asia, Europe and the Islamic world will be investigated focusing primarily on their influence and contributions to the pre-modern and modern world.  
The course involves two Depth Studies and overview of the period with the depth studies based on Medieval Europe and Japan under the Shoguns.  
Research and use of Primary and Secondary Sources form the foundation of this course.  
Civics and Citizenship is integrated into year 8 History course.  

**ASSESSMENT**  
Four to six summative tasks per semester covering assessment in oral, written, visual and ICT literacy.  
Each Summative (major) task is worth 10-15% of the total grade.  

**SPECIAL REQUIREMENTS** Nil

**CONTENT**  
This semester course focuses on the period 1750-1918: a period which saw major upheavals, wars and revolutions across the World. It was an era characterised Nationalism, Imperialism, the emergence of new states/countries and the first global modern conflict.  
Students will investigate these issues though three depth studies based on Inquiry questions.  
The depth studies will focus on the Industrial Revolution, The Making of our Nation (Australian History) and World War One.  
Students will locate and use a range of primary and secondary sources to make deductions about the periods and issues under study.  

**ASSESSMENT**  
Four to six summative assessment tasks per semester covering assessment in oral, written, visual and ICT literacy.  
Each Summative (major) task is worth 10-15% of the total grade.

**CONTENT**

An objective is for students to learn enough about our legal system to emerge with sufficient confidence to understand how it affects their lives. The subject aims to develop in students an appreciation of law and the legal system. The topic “Law and Society” will be studied along with a range of other topics which may include: Law Making, Justice and Society and Young People and the law.

Issues/topics may include:
- Young people and the law
- Motorists and the Law
- Law Making
- Justice and Society

**ASSESSMENT**

- A Folio of work – written (essay, report, tests), multi-media assignments.
- Issue Study – 1000 in-depth research on a current legal issue.
- Presentation – such as a poster, participation in mock parliament or debate which have an oral component attached.

**CONTENT**

In the study of Modern History at Stage 1, students explore changes within the world since 1750, examining developments and movements of significance, the ideas that inspired them, and their short-term and long-term consequences for societies, systems, and individuals.

Students explore the impacts that these developments and movements had on people’s ideas, perspectives, and circumstances. They investigate ways in which people, groups, and institutions challenge political structures, social organisation, and economic models to transform societies.

Students consider the dynamic processes of imperialism, revolution, and decolonisation, and how these have reconfigured political, economic, social, and cultural systems. Students also look at how recognition of the rights of individuals and societies has created challenges and responses.

Through their studies, students build their skills in historical method through inquiry, by examining and evaluating the nature of sources. This includes who wrote or recorded them, whose history they tell, whose stories are not included and why, and how technology is creating new ways in which histories can be conveyed. Students explore different interpretations, draw conclusions, and develop reasoned historical arguments.

**ASSESSMENT**

- Assessment Type 1: Historical Skills Three historical skills assessments/summative tasks
- Assessment Type 2: Historical Study The historical study must be based on an aspect of the world since 1750. Students inquire into, explore, interpret, and research a historical idea, event, person, or group in depth.

Negotiated in consultation with the Teacher.

**SPECIAL REQUIREMENTS** This course lays the foundation for Stage 2 History.
Students critically engage with texts, including literary texts, and analyse archaeological sources, and primary and secondary historical sources. Students develop the inquiry skills that enable them to challenge or confirm beliefs, attitudes, and values in the ancient world. The inquiry gives students an opportunity to explore an area of specialisation of individual interest and extend their skills.

**ASSESSMENT**
Consists of three components:
Assessment Type 1: four Summative Tasks focusing on the application of skills: 50%
Assessment Type 2: two Comparative Tasks: 20%
Assessment Type 3: Negotiated Inquiry (2000 words): 30%

**SPECIAL REQUIREMENTS**
If you intend studying Ancient Studies at Stage 2 it should be noted that is an advantage to have studied at least one semester of History/Ancient Studies in Stage 1 as you will gain skills and insights which are essential in this subject.

**Modern History**

**CODE** MOD5E  **LEVEL** Stage 2  **LENGTH** Full year  **CREDITS** 20

**CONTACT PERSON** Jack Kyriakou

**RECOMMENDED BACKGROUND**
Modern History is a language rich subject and as such strong literacy and critical thinking skills are highly recommended.

**CONTENT**
This course focuses on two broad topics: Modern Hitler and NG21 Germany Nations and The world since 1945 (Cold War)
In their study of a topic from 'Modern Nations', students investigate the concepts of 'nation' and 'state', and the social, political, and economic changes that shaped the development of a selected nation.
(Post Nazi Germany) Through their study, they develop insights into the characteristics of modern nations, crises, and challenges that have confronted them, ways in which nations have dealt with internal divisions and external challenges, and the different paths that nations have taken.

In their study of a topic from ‘The World since 1945 (Cold War)’, students investigate the political, social, and economic interactions among nations and states, and the impact of these interactions on national, regional, and/or international development. They consider how some emerging nations and states sought to impose their influence and power, and how others sought to forge their own destiny.

Students explore relationships among nations, states, and groups, and examine some significant and distinctive features of the world since 1945, to understand the contemporary world.
Through their studies, students build their skills in historical method through inquiry, by examining and evaluating the nature of sources.
They explore different interpretations, draw conclusions, and develop reasoned historical arguments.

**ASSESSMENT**
Assessment Type 1: Historical Skills 50%
Students complete five summative tasks based on the application of historical skills.

Assessment Type 2: Historical Study: 2000 words 20%
Students undertake an individual historical study based on an aspect of the world since c.1750.

Assessment Type 3: Examination 30%
Students complete a two hour external examination that is divided into two sections:
Section 1: ONE Essay
Section 2: Sources Analysis.

Sound literacy and analytical skills.

**CONTENT**
Tourism is a study of tourism activities and their social, cultural economic and environmental effects. It seeks to understand these activities and effects from a range of perspectives, and to predict the future orientation of tourism. An understanding of the sustainable management of tourism activities underpins much of this course. It seeks to develop a variety of interpersonal skills and skills of observation, investigation, communication, analysis, critical thinking and literacy. These include:
- Operations and Structures of the tourism Industry
- Travellers’ Perceptions and Interaction of Host Community and visitor
- Sustainable Tourism
- Nature of Work in the tourism Industry.
A number of optional topics will also be covered, e.g.
- Responsible travel
- Managing the impacts of Tourism
- Indigenous People and Tourism

**ASSESSMENT**
School-based Assessment
- Type 1: Folio 20%
- Type 2: Practical Activity 25%
- Type 3: Investigation 25%
External Assessment
- Type 4: Examination 30%

**SPECIAL REQUIREMENTS** Nil

---

**Women’s Studies**

**CODE** WOM5E  **LEVEL** Stage 2  **LENGTH** Full year  **CREDITS** 20
**CONTACT PERSON** Georgie Barker
**RECOMMENDED BACKGROUND**
Sound literacy and critical thinking skills.

**CONTENT**
Students use their understanding of gender identity (femininity / masculinity), gender relations (gender stereotypes, public / private distinction), and identity as difference (identity politics) to work through four to six of the following key issues:
- Representations of Women in Cultural Texts
- Women and Work
- Family Life and Caring
- Health and Well-being
- Women and the Law
- Women’s Struggles, Achievements, and Empowerment
- Women, Culture and Society
- Lifestyle and Choice
- Communication and Technology
- Development and Globalisation
- Negotiated Issue

This subject requires students to apply critical thinking to gender based issues across time and cultures. It involves students in selecting, analysing and evaluating a range of primary and secondary sources.

**ASSESSMENT**
School-based Assessment: Text Analysis, Essay, Folio 70%
External Assessment: 2,000 word Issues Analysis 30%

**SPECIAL REQUIREMENTS** Nil
Language education is an investment in Australia’s future. It has cognitive, social, political and economic advantages both for the individual and for society as a whole.

The Australian Curriculum

The Languages curriculum for 2019 in years 8-10 is aligned to the Australian Curriculum requirements.

The key concepts of language, culture, and learning underpin the learning area and provide the basis for a common rationale and set of aims that apply to all languages. Languages is designed to enable students to engage in learning a language in addition to English.

Language is organised by two interrelated strands:

Communicating: using language for communicative purposes in interpreting, creating, and exchanging meaning; and

Understanding: using language for communicative purposes in interpreting, creating and exchanging meaning.

Content descriptions aim to ensure that students develop the skills, knowledge, and understanding required to communicate in the target language, to understand language and culture and to develop an intercultural capability in communication.

Achievement standards describe what students are expected to achieve and how well.

The Languages curriculum – content and achievement standards – is organised in bands for each sequence of learning:

The study of languages contributes to the general education of all students. It operates from the fundamental principle that for all students, learning to communicate in two or more languages is a rich, challenging experience of engaging with and participating in the linguistic and cultural diversity of our interconnected world.

The Australian Curriculum recognises Australia’s distinctive and dynamic migration history. Language learning builds upon students’ intercultural understanding and sense of identity as they are encouraged to explore and recognise their own linguistic, social, and cultural practices and identities as well as those associated with speakers of the language being learnt.

Learning languages also develops students’ overall literacy, strengthening literacy-related capabilities that are transferable across learning areas.

The SACE

The Languages curriculum options in years 11 and 12 are aligned to the SACE requirements.

Student Exchange

There are many opportunities for language students interested in travelling internationally to practise their linguistic skills. Each year an increasing number of Brighton Secondary Language students are undertaking exchanges.

By travelling overseas or hosting an exchange student, young people of different nationalities are given the opportunity to become acquainted with another culture, its language, heritage and values. The best way to understand another way of life is to be part of a family. When you become part of a family, you have the rare and valuable opportunity of experiencing life from the inside rather than viewing it as a tourist. The language you have learned comes alive as you make new friends, share your culture and discover new things about yourself and the world.

Upon return, the benefits include greater self-confidence and a better awareness of the world we share. Improved communication skills and personal growth give you a competitive edge in pursuing educational and career goals, and you are better prepared to contribute as a world citizen. The fun, friendship and rewarding educational benefits of being involved in an international exchange can make the experience unforgettable.

Throughout the year the Language Faculty will receive information about a variety of exchanges. These vary in length, cost and experience. Whilst these will be advertised, it is important that students interested in undertaking an exchange make their intention known to their teacher.
Languages (continued)

Additional Opportunities

Students have the chance to enter the national Assessment of Language Competence tests run by the ACER, and the state-run Alliance Française competition which can lead to a national prize.

They also have the option of studying extra languages including Chinese background speakers through the School of Languages.

Language Program Year 8

**Year 8 Language Beginners (1st semester only)**
Recommended for students wanting to complete minimum language requirements at year 8. Students completing this course will not have the recommended background to continue language study in year 9. Students may be able to continue their language study in second semester should they decide to continue their language study in year 9.

**Year 8 Language Beginners (full year)**
Recommended for students who are starting a new language at year 8 or for students who want to consolidate their primary school language learning. Recommended for students who are considering continuing their language studies at year 9 level or beyond.

*N.B. Special Interest Music (SIM) students can only study one semester of language in year 8. SIM students wanting to continue language study at year 9 must participate in an independent language program in their non language semester.

Year 8 Language Accelerated Program (i.e. Year 9 Language Program – full year)

This pathway recognises prior learning providing opportunity for students to complete the year 12 subject in year 11. Recommended for students who have studied the language in R-7 and have excelled in their language studies. These students will need to successfully sit a language proficiency test in order to enrol in this year 9 course.

As a condition of entry into the Accelerated Language Program students will need to be self-motivated and have strong work ethic in order to be successful learners. Student progress will be closely monitored. Students exhibiting low engagement and achievement will be recommended for transition back to a standard language course.

Special Interest Music students may not enrol in the Accelerated Language Program due to timetable restrictions. Volleyball and Think Bright students may apply although timetable restrictions could prevent placement in an Accelerated class.

Overseas Trips

Students in years 9-11 will have the opportunity to participate in overseas excursions to Japan and Vanuatu.

SACE - Integrated Learning

The flexibility of this course enables native language speakers to study at an advanced proficiency level and make links between aspects of their lives, their learning about themselves and their capabilities.

This course is open to proficient language students at Stage 1 and 2 who would otherwise be ineligible to enrol in the Continuers course.

Course used: *Allons-y 1*

Communicative topics may include: greetings, nationality, age, family and pets, classroom objects, subjects and timetable, likes and dislikes, instructions, date and time, possession, position and direction, ordering in a café, asking questions, food shopping.

Cultural topics include: French speaking countries, life in medieval France, the European Union, geography of France, holidays and celebrations, the Eiffel Tower, the importance of food in French culture.

**ASSESSMENT**

Assessment contains aspects of intercultural literacy, listening, speaking, reading and writing with an emphasis placed on interactive communication skills. Weightings vary according to class circumstances.

**CURRICULUM CHARGES**

$20 per semester

(full year students pay $40)

**CONTENT**

Course Used: *Mirai Book 1*

Introduction of the hiragana writing system. Emphasis on reading comprehension and writing skills with regard to the hiragana script; some basic kanji.

Communicative topics involving:

- self-introduction, greetings, name, age, phone number, nationality, adjectives
- food, restaurant menus, ordering food
- family, family members and descriptions
- residence, cities and towns, facilities and descriptions
- activities and likes, days of the week
- cultural research assignment
- culture: restaurant excursion, Japanese cuisine, teenage interests, family traditions, major cities in Japan, writing systems, popular after-school activities.

**ASSESSMENT**

Assessment contains aspects of listening, speaking, reading and writing with an emphasis placed on hiragana writing and reading skills. Weightings vary according to class circumstances.

**CURRICULUM CHARGES**

$20 per semester

(full year students pay $40)

**CONTENT**

Course used: *Allons-y 1-2*

Communicative topics include: weather, sports and leisure (modern and mediaeval), school year, expressing intention, transport, timetables, clothing, sizes and prices. Cultural topics include: regions of France, regional food, transport, French inventions, Martinique, fashion.

**ASSESSMENT**

The areas of intercultural literacy, listening, speaking, reading and writing are assessed in formal tests and informally in class. There is an emphasis placed on interactive communication skills. Weightings vary according to class circumstances.

**CURRICULUM CHARGES**

$40 per year

**CONTENT**

**Japanese**
- Course used: Mirai Stage 2
  - Revision of the hiragana script.
  - Introduction of the katakana script.
  - Introduction of relevant kanji.
  - Communicative topics involving:
    - telling the time, doing things at a time, frequency of activities and daily routines, physical appearance and describing things, planning, inviting, suggesting and asking permission, ability to do things, existence of things, describing home and the school, general instructions in the classroom and pointers, wanting to do/not do activities.
  - Culture:
    - family life, cuisine, education and sports.

**French**
- Course used: Allons-y 2
  - Communicative topics include:
    - employment, talking about past achievements, dictionary techniques, holidays, making a phone call, household chores, weekends, home, town and suburb, directions and map reading, appointments, illness and injury, detailed descriptions, personality, invitations and arrangements.
  - Cultural topics include: Canada and Quebec (history, geography, fauna, and cuisine), New Caledonia, French architecture, housing and lifestyle, Provence, French art, poetry and entertainment, Algeria, the Alps.

**ASSESSMENT**

The areas of intercultural literacy, listening, speaking, reading and writing are assessed in formal tests and informally in class. Equal emphasis is placed on all areas. Equal emphasis is placed on all areas. Weightings vary according to class circumstances.

Mathematics learning is the ability to understand, critically respond to and use mathematics in different social, cultural and work contexts.

The Australian Curriculum
The Mathematics curriculum for years 8 to 10 in 2019 is aligned to the interaction of three content strands and four proficiency strands of the Australian Curriculum.

The content strands are Number and Algebra, Measurement and Geometry, and Statistics and Probability. They describe what is to be taught and learnt.

The proficiency strands are Understanding, Fluency, Problem Solving, and Reasoning. They describe how content is explored or developed, that is, the thinking and doing of mathematics.

Number and Algebra
Number and Algebra are developed together, as each enriches the study of the other. Students apply number sense and strategies for counting and representing numbers. They explore the magnitude and properties of numbers. They apply a range of strategies for computation and understand the connections between operations. They recognise patterns and understand the concepts of variable and function. They build on their understanding of the number system to describe relationships and formulate generalisations. They recognise equivalence and solve equations and inequalities. They apply their number and algebra skills to conduct investigations, solve problems and communicate their reasoning.

Measurement and Geometry
Measurement and Geometry are presented together to emphasise their relationship to each other, enhancing their practical relevance. Students develop an increasingly sophisticated understanding of size, shape, relative position and movement of two-dimensional figures in the plane and three-dimensional objects in space. They investigate properties and apply their understanding of them to define, compare and construct figures and objects. They learn to develop geometric arguments. They make meaningful measurements of quantities, choosing appropriate metric units of measurement. They build an understanding of the connections between units and calculate derived measures such as area, speed and density.

Statistics and Probability
Statistics and Probability initially develop in parallel and the curriculum then progressively builds the links between them. Students recognise and analyse data and draw inferences. They represent, summarise and interpret data and undertake purposeful investigations involving the collection and interpretation of data. They assess likelihood and assign probabilities using experimental and theoretical approaches. They develop an increasingly sophisticated ability to critically evaluate chance and data concepts and make reasoned judgments and decisions, as well as building skills to critically evaluate statistical information and develop intuitions about data.

Proficiency strands
The proficiency strands describe the actions in which students can engage when learning and using the content.

Understanding
Students build a robust knowledge of adaptable and transferable mathematical concepts. They make connections between related concepts and progressively apply the familiar to develop new ideas. They develop an understanding of the relationship between the ‘why’ and the ‘how’ of mathematics. Students build understanding when they connect related ideas, when they represent concepts in different ways, when they identify commonalities and differences between aspects of content, when they describe their thinking mathematically and when they interpret mathematical information.

Fluency
Students develop skills in choosing appropriate procedures, carrying out procedures flexibly, accurately, efficiently and appropriately, and recalling factual knowledge and concepts readily. Students are fluent when they calculate answers efficiently, when they recognise robust ways of answering questions, when they choose appropriate methods and approximations, when they recall definitions and regularly use facts, and when they can manipulate expressions and equations to find solutions.
Problem Solving
Students develop the ability to make choices, interpret, formulate, model and investigate problem situations, and communicate solutions effectively. Students formulate and solve problems when they use mathematics to represent unfamiliar or meaningful situations, when they design investigations and plan their approaches, when they apply their existing strategies to seek solutions, and when they verify that their answers are reasonable.

Reasoning
Students develop an increasingly sophisticated capacity for logical thought and actions, such as analysing, proving, evaluating, explaining, inferring, justifying and generalising. Students are reasoning mathematically when they explain their thinking, when they deduce and justify strategies used and conclusions reached, when they adapt the known to the unknown, when they transfer learning from one context to another, when they prove that something is true or false and when they compare and contrast related ideas and explain their choices.

The SACE
The Mathematics subject options in years 11 and 12 are aligned to the SACE.

**CODE** MEM4A and MEM4B  
**LEVEL** Stage 1  
**LENGTH** 1 semester each  
**CREDITS** 10 credits per semester  
**CONTACT PERSON** Femia Bakuszowski  
**RECOMMENDED BACKGROUND**  
Open to all students. To study Essential Mathematics at Stage 2, students must complete two semesters of Essential Mathematics at Stage 1.

**CONTENT**  
Essential Mathematics focuses on using mathematics effectively, efficiently and critically to make informed decisions. It provides students with the mathematical knowledge, skills and understanding to solve problems in real contexts for a range of workplace, personal, further learning and community settings.

Stage 1 Essential Mathematics consists of the following list of six topics:  
- Topic 1: Calculations, Time, and Ratio  
- Topic 2: Earning and Spending  
- Topic 3: Geometry  
- Topic 4: Data in Context  
- Topic 5: Measurement  
- Topic 6: Investing

**ASSESSMENT**  
The assessment will comprise of Skills and Applications Tasks and Folio.

**CONTACT PERSON** Femia Bakuszowski  
**RECOMMENDED BACKGROUND**  
An A or B from year 10 General Mathematics. To study General Mathematics at Stage 2, students must complete two semesters of Stage 1 General Mathematics.

**CONTENT**  
General Mathematics focuses on using the techniques of discrete mathematics to solve problems in contexts that include financial modelling, network analysis, route and project planning, decision-making, and discrete growth and decay. It enables students to analyse and solve a wide range of geometrical problems in areas such as measurement, scaling, triangulation and navigation; and to develop systematic strategies to answer statistical questions that involve comparing groups, investigating associations and analysing time series.

Stage 1 General Mathematics consists of the following list of six topics:  
- Topic 1: Investing and borrowing  
- Topic 2: Measurement  
- Topic 3: Statistical Investigation  
- Topic 4: Applications of Trigonometry  
- Topic 5: Linear Functions and their Graphs  
- Topic 6: Matrices and Networks

**ASSESSMENT**  
The assessment will comprise of Skills and Applications Tasks and Mathematical Investigations.

**SPECIAL REQUIREMENTS**  
A graphics calculator is a required item for students taking this subject. A Casio FXC650AU is recommended.

RECOMMENDED BACKGROUND
An A or B grade from year 10 Mathematical Methods. To study Stage 2 Mathematical Methods, students must study two semesters of Mathematical Methods at Stage 1.

CONTENT
Mathematical Methods focuses on the development of the use of calculus and statistical analysis. The study of calculus provides a basis for an understanding of the physical world involving rates of change, and includes the use of functions, their derivatives and integrals, in modelling physical processes. The study of statistics develops the ability to describe and analyse phenomena involving uncertainty and variation.

Stage 1 Mathematical Methods consists of the following list of six topics:
Topic 1: Functions and graphs
Topic 2: Trigonometry
Topic 3: Counting and Statistics
Topic 4: Polynomials
Topic 5: Growth and Decay
Topic 6: Introduction to Differential Calculus

ASSESSMENT
The assessment will comprise of Skills and Applications Tasks and Mathematical Investigations.

SPECIAL REQUIREMENTS
A graphics calculator is a required item for students taking this subject. A Casio FXC650AU is recommended.

RECOMMENDED BACKGROUND
An A or B grade from year 10 Mathematical Methods. To study Stage 2 Mathematical Specialist, a student must be enrolled in Stage 2 Mathematical Methods.

To study Stage 2 Specialist Mathematics, a student must have successfully completed two semesters of Mathematical Methods and two semesters of Specialist Mathematics at Stage 1.

CONTENT
Specialist Mathematics provides opportunities, beyond those presented in Mathematical Methods, to develop rigorous mathematical arguments and proofs, and to use mathematical models more extensively. It contains topics in functions and calculus that build on and deepen the ideas presented in Mathematical Methods as well as demonstrate their application in many areas. Specialist Mathematics also extends students’ knowledge and understanding of probability and statistics and introduces the topics of vectors, complex numbers, matrices and recursive methods.

Specialist Mathematics is designed to be studied in conjunction with Mathematical Methods.

Stage 1 Specialist Mathematics consists of the following list of six topics:
Topic 1: Arithmetic and Geometric Sequences and Series
Topic 2: Geometry
Topic 3: Vectors in the Plane
Topic 4: Trigonometry
Topic 5: Matrices
Topic 6: Real and Complex Numbers

ASSESSMENT
The assessment will comprise of Skills and Applications Tasks and Mathematical Investigations.

SPECIAL REQUIREMENTS
A graphics calculator is a required item for students taking this subject. A Casio FXC650AU is recommended.

<tr>
<td>Essential Mathematics offers senior secondary students the opportunity to extend their mathematical skills in ways that apply to practical problem-solving in everyday and workplace contexts. Students apply their mathematics to diverse settings, including everyday calculations, financial management, business applications, measurement and geometry, and statistics in social contexts. In Essential Mathematics there is an emphasis on developing students’ computational skills and expanding their ability to apply their mathematical skills in flexible and resourceful ways. This subject is intended for students planning to pursue a career in a range of trades or vocations. Topics Studied:</td>
<td>General Mathematics extends students’ mathematical skills in ways that apply to practical problem-solving. A problem-based approach is integral to the development of mathematical models and the associated key concepts in the topics. Topics cover a diverse range of applications of mathematics, including personal financial management, the statistical investigation process, modelling using linear and non-linear functions, and discrete modelling using networks and matrices. Successful completion of General Mathematics at Stage 2 prepares students for entry to tertiary courses requiring a non-specialised background in mathematics. Topics Studied:</td>
<td>Mathematical Methods develops an increasingly complex and sophisticated understanding of calculus and statistics. By using functions and their derivatives and integrals, and by mathematically modelling physical processes, students develop a deep understanding of the physical world through a sound knowledge of relationships involving rates of change. Students use statistics to describe and analyse phenomena that involve uncertainty and variation. Mathematical Methods provides the foundation for further study in mathematics, economics, computer sciences, and the sciences. It prepares students for courses and careers that may involve the use of statistics, such as health or social sciences. When studied together with Specialist Mathematics, this subject can be a pathway to engineering, physical science, and laser physics. Topics Studied:</td>

CURRICULUM CHARGES $12
The Australian Curriculum

The science curriculum for 2019 in years 8 to 11 is aligned to the Australian Curriculum. Refer to page 13 for more details about the implementation of the Australian Curriculum.

The Australian Curriculum for Science has three interrelated strands: Science Understanding, Science as a Human Endeavour and Science Inquiry Skills.

As well as the specific science strands there are General Capabilities and Cross-curriculum Priorities which apply in all subject areas.

Together, the three strands of the science curriculum provide students with understanding, knowledge and skills through which they can develop a scientific view of the world. Students are challenged to explore science, its concepts, nature and uses through clearly described inquiry processes.

The Science Understanding strand comprises four sub-strands.

Biological Sciences

The biological sciences sub-strand is concerned with understanding living things:

- a diverse range of living things have evolved on Earth over hundreds of millions of years
- living things are interdependent and interact with each other and their environment
- the form and features of living things are related to the functions that their body systems perform
- life cycles, body systems, adaptations and survival
- how their characteristics are inherited from one generation to the next
- the cell as the basic unit of life and its function.

Chemical Sciences

The chemical sciences sub-strand is concerned with understanding the composition and behaviour of substances:

- chemical and physical properties of substances are determined atomic structure
- substances change and new substances are produced by rearranging atoms – chemical reactions
- classify substances based on their properties, such as solids, liquids and gases
- elements, compounds and mixtures
- physical changes such as changes of state and dissolving
- atoms which can combine to form molecules, and chemical reactions involve atoms being rearranged and recombined to form new substances
- explore the relationship between the way in which atoms are arranged and the properties of substances, and the effect of energy transfers on these arrangements.

Earth and Space Sciences

The Earth and Space sciences sub-strand is concerned with Earth's dynamic structure and its place in the cosmos:

- Earth is part of a solar system that is part of a larger universe
- Earth is subject to change within and on its surface, through natural processes and human use of resources.
- Earth as part of a solar system, which is part of a galaxy and the immense universe
- Changes on Earth, such as day and night and the seasons
- Evolution of Earth over 4.5 billion years
- Humans use of resources from the Earth and the influence of human activity on the Earth.

Science education contributes to developing scientifically literate global citizens who will better be able to make informed decisions about their personal lives and how environments can be sustained.
Science (continued)

Physical Sciences
The Physical Sciences sub-strand is concerned with understanding the nature of forces and motion, and matter and energy:
- Forces affect the behaviour of objects
- Energy can be transferred and transformed from one form to another
- Motion (direction, speed and acceleration) is influenced by a range of contact and non-contact forces such as friction, magnetism, gravity and electrostatic forces
- energy and energy transfer – motion, heat, sound, light and electricity.

Science as a Human Endeavour
Through science, humans seek to improve their understanding and explanations of the natural world. Science involves the construction of explanations based on evidence and science knowledge can be changed as new evidence becomes available. Science influences society by posing, and responding to, social and ethical questions, and scientific research is itself influenced by the needs and priorities of society. This strand highlights the development of science as a unique way of knowing and doing, and the role of science in contemporary decision making and problem solving. It acknowledges that in making decisions about science practices and applications, ethical and social implications must be taken into account. This strand also recognises that science advances through the contributions of many different people from different cultures and that there are many rewarding science-based career paths.

Science Inquiry Skills
Science inquiry involves identifying and posing questions; planning, conducting and reflecting on investigations; processing, analysing and interpreting evidence; and communicating findings. This strand is concerned with evaluating claims, investigating ideas, solving problems, drawing valid conclusions and developing evidence-based arguments.

Science investigations are activities in which ideas, predictions or hypotheses are tested and conclusions are drawn in response to a question or problem. Investigations can involve a range of activities, including experimental testing, field work, locating and using information sources, conducting surveys, and using modelling and simulations. The choice of the approach taken will depend on the context and subject of the investigation.

In science investigations, collection and analysis of data and evidence play a major role. This can involve collecting or extracting information and reorganising data in the form of tables, graphs, flow charts, diagrams, prose, keys, spreadsheets and databases.

Achievement Standards

Year 8
By the end of year 8, students compare physical and chemical changes and use the particle model to explain and predict the properties and behaviours of substances. They identify different forms of energy and describe how energy transfers and transformations cause change in simple systems. They compare processes of rock formation, including the time scales involved. They analyse the relationship between structure and function at cell, organ and body system levels. Students examine the different science knowledge used in occupations. They explain how evidence has led to an improved understanding of a scientific idea and describe situations in which scientists collaborated to generate solutions to contemporary problems.

Students identify and construct questions and problems that they can investigate scientifically. They consider safety and ethics when planning investigations, including designing field or experimental methods. They identify variables to be changed, measured and controlled. Students construct representations of their data to reveal and analyse patterns and trends, and use these when justifying their conclusions. They explain how modifications to methods could improve the quality of their data and apply their own scientific knowledge and investigation findings to evaluate claims made by others. They use appropriate language and representations to communicate science ideas, methods and findings in a range of text types.

Details of the specific assessment tasks will be described in the learning and assessment plan.

Year 9
By the end of year 9, students explain chemical processes and natural radioactivity in terms of atoms and energy transfers and describe examples of important chemical reactions. They describe models of energy transfer and apply these to explain phenomena. They explain global features and events in terms of geological processes and timescales. They analyse how biological systems function and respond to external changes with reference to interdependencies, energy transfers and flows of matter. They describe social and technological factors that have influenced scientific developments and predict how future applications of science and technology may affect people’s lives.

Students design questions that can be investigated using a range of inquiry skills. They design methods that include the control and accurate measurement of variables and systematic collection of data and describe how they considered ethics and safety. They analyse trends in data, identify relationship between variables and reveal inconsistencies in results. They analyse their methods and the quality of their data, and explain specific actions to improve the quality of their evidence. They evaluate others’ methods and explanations from a scientific perspective and use appropriate language and representations when communicating their findings and ideas to specific audiences.

Details of the specific assessment tasks will be described in the learning and assessment plan.
By the end of year 10, students analyse how the periodic table organises elements and use it to make predictions about the properties of elements. They explain how chemical reactions are used to produce particular products and how different factors influence the rate of reactions. They explain the concept of energy conservation and represent energy transfer and transformation within systems.

They apply relationships between force, mass and acceleration to predict changes in the motion of objects. Students describe and analyse interactions and cycles within and between Earth’s spheres. They evaluate the evidence for scientific theories that explain the origin of the universe and the diversity of life on Earth. They explain the processes that underpin heredity and evolution. Students analyse how the models and theories they use have developed over time and discuss the factors that prompted their review.

Students develop questions and hypotheses and independently design and improve appropriate methods of investigation, including fieldwork and laboratory experimentation.

They explain how they have considered reliability, safety, fairness and ethical actions in their methods and identify where digital technologies can be used to enhance the quality of data. When analysing data, selecting evidence and developing and justifying conclusions, they identify alternative explanations for findings and explain any sources of uncertainty. Students evaluate the validity and reliability of claims made in secondary sources with reference to currently held scientific views, the quality of the methodology and the evidence cited. They construct evidence-based arguments and select appropriate representations and text types to communicate science ideas for specific purposes.

Details of the specific assessment tasks will be described in the learning and assessment plan.

**The SACE**

The Science subject options in Stage 1 and 2 are aligned to the SACE requirements. The various Science pathways are outlined in the flowchart.

<td><strong>Science for Life</strong></td>
<td>SFL3Y</td>
<td>Year 10</td>
<td>Semester</td>
<td>Toby Ward</td>
<td>Nil</td>
<td>Science for Life examines how we can use science to gain a better understanding of personal health and wellbeing with a focus on sustainability. We will explore how diet and exercise choices are linked to quality of life and building a sustainable society. Students will develop their own project around Science for Life themes to enter into the CSIRO's Creativity in Science and Technology (CREST) awards.</td>
<td>The focus of assessment will be on real world applications of science to improve health and fitness. With integrated numeracy and literacy skills students will be assessed using practical and team work activities. Assessment tasks include the CREST awards submission, maintaining a journal for self-reflection, and regular written and practical tasks.</td>
<td>This is a one semester subject for students who enjoy hands-on, practical Science but who are NOT looking to pursue Science through to Stage 2. This subject limits Stage 1 Science options to Sustainability only and does not lead into any Science subject at Stage 2.</td>

<td>Semester</td>
<td>Toby Ward</td>
<td>C grade or better and a recommendation from the year 10 science teacher.</td>
<td>Students examine the development of the cell theory, the exchange of materials, and processes required for cell survival. They investigate ways in which matter is recycled and energy is transformed and transferred in biochemical processes. Students learn about the conditions necessary for the growth and survival of microorganisms, the uses of microorganisms, and their role in decomposition and food spoilage. Students examine the various agents that can cause infectious diseases. Stage 1 Biology students who intend to study Biology at Stage 2 would benefit from a Stage 1 program that includes Topic 1: Cells and Microorganisms. Topics studied include:  • Cells and Microorganisms  • Infectious Disease</td>
<td>Assessment tasks include opportunities for students to develop the capabilities, numeracy and literacy. They will complete an Investigation folio which may include completion or design practicals, research and a Science as a Human Endeavor Investigation. Skills and applications tasks may include written tests, practical tests or oral presentations. Details of the assessment tasks will be described in the Learning and assessment plan.</td>
<td>Students can continue into Stage 2 Biology by successfully completing either CMID or MOBE Biology or both.</td>
</tr>
<tr>
<td><strong>Biology MOBE</strong></td>
<td>BLR4S</td>
<td>Stage 1</td>
<td>Semester</td>
<td>Toby Ward</td>
<td>C grade or better and a recommendation from the year 10 science teacher.</td>
<td>Students examine the structure and function of various multicellular organisms. Students consider the structure and function of various organ systems in human beings and other species. Students will develop an understanding of how biotechnology has contributed to an understanding of how multicellular organisms function. Students investigate diverse ecosystems, exploring the range of biotic and abiotic components. Students develop an understanding of the processes involved in the movement of energy and matter in ecosystems. They investigate ecosystem dynamics, and interactions between abiotic and biotic components of ecosystems. Topics studied include:  • Multicellular Organisms  • Biodiversity and Ecosystem Dynamics</td>
<td>Assessment tasks include opportunities for students to develop the capabilities, numeracy and literacy. They will complete an Investigation folio which may include completion or design practicals, research and issues assignments. Skills and applications tasks may include written tests, practical tests or oral presentations. Details of the assessment tasks will be described in the Learning and assessment plan.</td>
<td>Students can continue into Stage 2 Biology by successfully completing either CMID or MOBE Biology or both.</td>

### Chemistry A
- **CODE**: CEM4A
- **LEVEL**: Stage 1
- **LENGTH**: Semester
- **CREDITS**: 10
- **CONTACT PERSON**: Toby Ward
- **RECOMMENDED BACKGROUND**: C grade or better and a recommendation from the year 10 science teacher.

**CONTENT**
Chemistry is the study of the nature of substances, the ways in which substances can interact with each other, and their impact on the environment. Topics studied in Chemistry A include:
1. Materials and their atoms
2. Combinations of atoms
3. Molecules

All topics involve theoretical and practical work. A science as a human endeavor investigation will occur during the semester.

**ASSESSMENT**
Assessment tasks include opportunities for students to develop the capabilities of numeracy and literacy. They will complete an Investigation folio which may include completion or design practicals, research and a Science as a Human Endeavour Investigation. Skills and applications tasks may include written tests and practical tests. Details of the assessment tasks will be described in the Learning and assessment plan.

**SPECIAL REQUIREMENTS**: Nil

### Chemistry B
- **CODE**: CEM4B
- **LEVEL**: Stage 1
- **LENGTH**: Semester
- **CREDITS**: 10
- **CONTACT PERSON**: Toby Ward
- **ESSENTIAL BACKGROUND**: C grade or better in Chemistry A Semester 1. Semester 1 must be completed to attempt Semester 2.

**CONTENT**
This course builds on the content covered in Chemistry A. Topics studied in Chemistry B include:
1. Mixtures and solutions
2. Acids and Bases
3. Redox reactions

All topics involve theoretical and practical work. A Science as a Human Endeavor Investigation will occur during the semester.

**ASSESSMENT**
Assessment tasks include opportunities for students to develop the capabilities of numeracy and literacy. They will complete an Investigation folio which may include completion or design practicals, research and Science as a Human Endeavour Investigation. Skills and applications tasks may include written tests and practical tests. Details of the assessment tasks will be described in the Learning and assessment plan.

**SPECIAL REQUIREMENTS**: Nil

### Physics A
- **CODE**: PYI4A
- **LEVEL**: Stage 1
- **LENGTH**: Semester
- **CREDITS**: 10
- **CONTACT PERSON**: Toby Ward
- **RECOMMENDED BACKGROUND**: C grade or better and a recommendation from the year 10 science teacher.

**CONTENT**
Physics helps people to understand the world around them. It is a subject for students who are interested in the fundamental processes of nature. Students are introduced to the basic laws of the physical world. The laws of physics underlie many other sciences and engineering and also provide background knowledge for many occupations. The subject includes:
1. The physics of motion – velocity, speed, acceleration
2. What causes motion – forces, Newton’s Laws
3. Current electricity
4. Heat

**ASSESSMENT**
Assessment tasks include opportunities for students to develop the capabilities of numeracy and literacy. They will complete an Investigation folio which may include completion of design practicals, and a Science as a Human Endeavour Investigation. Skills and applications tasks may include written tests, practical tests or oral presentations. Details of the assessment tasks will be described in the Learning and assessment plan.

**SPECIAL REQUIREMENTS**: Nil
### Physics B

**CODE** PY14B  
**LEVEL** Stage 1  
**LENGTH** Semester  
**CREDITS** 10  
**CONTACT PERSON** Toby Ward  
**ESSENTIAL BACKGROUND**  
C grade or better in Physics A Semester 1. Semester 1 must be completed to attempt Semester 2.  
**CONTENT**  
This course builds on the content covered in Physics A. Students are reacquainted with the laws of Physics and are introduced to extended studies of the concepts such as:  
1. Momentum  
2. Energy – the laws of conservation, kinetic energy, potential energy, wave energy  
3. Waves, the properties of waves, including sound and light  
4. Nuclear Models and Radioactivity  
**ASSESSMENT**  
Assessment tasks include opportunities for students to develop the capabilities, numeracy and literacy. They will complete an Investigation folio which may include completion of design practicals, research and a Science as a Human Endeavour Investigation. Skills and applications tasks may include written tests, practical tests or oral presentations. Details of the assessment tasks will be described in the Learning and assessment plan.  
**SPECIAL REQUIREMENTS** Nil

### Psychology A (Introduction)

**CODE** PSC4A  
**LEVEL** Stage 1  
**LENGTH** Semester  
**CREDITS** 10  
**CONTACT PERSON** Toby Ward  
**RECOMMENDED BACKGROUND**  
C grade or better and a recommendation from the year 10 science teacher. Good literacy skills also important.  
**CONTENT**  
This semester subject will explore the following topics:  
1. Introduction to the nature of psychology and the methods of investigation  
2. Ethical issues related to psychological research programs  
3. Brain and behaviour studies  
4. Human Psychological Development  
**ASSESSMENT**  
Assessment tasks include opportunities for students to develop the capabilities, numeracy and literacy. They will complete an Investigation folio which includes a practical report, research and issues assignments. Skills and applications tasks may include written tests, practical tests or oral presentations. Details of the assessment tasks will be described in the Learning and assessment plan.  
**SPECIAL REQUIREMENTS** Nil

### Psychology B (Optimum Psychology)

**CODE** PSC4B  
**LEVEL** Stage 1  
**LENGTH** Semester  
**CREDITS** 10  
**CONTACT PERSON** Toby Ward  
**ESSENTIAL BACKGROUND**  
C grade or better in Psychology A Semester 1. Semester 1 must be completed to attempt Semester 2.  
**CONTENT**  
This semester subject will explore the following topics:  
1. The influence of emotion on thought processes and social influence  
2. Optimal performance and how performers prepare to perform  
3. The social and psychological factors that influence successful performances in complex tasks  
4. Social influence and group dynamics  
5. Ethical issues related to psychological research programs  
**ASSESSMENT**  
Assessment tasks include opportunities for students to develop the capabilities, numeracy and literacy. They will complete an Investigation folio which includes a practical report, research and issues assignments. Skills and applications tasks may include written tests, practical tests or oral presentations. Details of the assessment tasks will be described in the Learning and assessment plan.  
**SPECIAL REQUIREMENTS** Nil
### Sustainability

**CODE** SST4S  
**LEVEL** Stage 1  
**LENGTH** Semester  
**CREDITS** 10  
**CONTACT PERSON** Toby Ward  
**RECOMMENDED BACKGROUND**  
C grade or better in year 10 Science and a recommendation from the year 10 science teacher.  

**CONTENT**  
The guiding question for the semester will be: How can I live my life more sustainably? The class will plan, design, plant and maintain a sustainable food garden in the school grounds. The content will be student driven with an emphasis on learning how to grow your own food irrespective of the space available. The class will investigate community gardens, food miles, organic gardening, water use and plan new initiatives for sustainable practices at Brighton Secondary School.

**ASSESSMENT**  
Assessment tasks include the opportunity for students to develop multiple capabilities. Numeracy and literacy will be a focus as well as citizenship and communication. Students will create an e-portfolio of work that documents their learning. This will include a personal journal, a self-reflection task, research tasks and written assignments. Students will also be assessed on their ability to work in teams and their practical skills. Details of the specific assessment tasks will be described in the learning and assessment plan.

**SPECIAL REQUIREMENTS**  
This is a one semester only stand-alone Science subject that does not lead into any science subject in Stage 2. Lessons will be held both indoors and outdoors and students will be required to participate in hands-on practical activities.

### Biology

**CODE** BGYSE  
**LEVEL** Stage 2  
**LENGTH** Full year  
**CREDITS** 20  
**CONTACT PERSON** Toby Ward  
**ESSENTIAL BACKGROUND**  
Stage 2 Biology builds on the skills and knowledge acquired in Stage 1 Biology. C grade or better in either Stage 1 Biology unit.  

**CONTENT**  
This subject develops an understanding of some of the fundamental ideas that are the backbone of Biological Science. Students investigate DNA and why it is so important to organisms. Students examine cell theory, the structure and function of the cell membrane, the exchange of materials, and processes required for cell survival. Students will develop an understanding of how homeostasis is the whole set of responses that occur in multicellular organisms, which enable their survival in their environment. Students will also examine the biological evidence that forms the basis for understanding the changes in species described in the theory of evolution by natural selection.

All topics involve theoretical and practical work.  
The major areas of study are:  
- DNA and Proteins  
- Cells as the Basis of Life  
- Homeostasis  
- Evolution  

**ASSESSMENT**  
School-based Assessment (70%) includes an Investigations Folio with practical activities and a Science as a Human Endeavour task, and Skills and Applications Tasks that include tests.  

External Assessment (30%) is an exam at the end of the year.

**SPECIAL REQUIREMENTS**  
Nil

### Chemistry

**CODE** CEM5E  
**LEVEL** Stage 2  
**LENGTH** Full year  
**CREDITS** 20  
**CONTACT PERSON** Toby Ward  
**ESSENTIAL BACKGROUND**  
Stage 2 Chemistry builds upon the concepts and knowledge studied in Stage 1. C grade or better in Stage 1 Chemistry A and B.

**CONTENT**  
This subject gives students the opportunity to develop ideas and understanding of how important chemistry is for the future of mankind. Students will investigate the impacts of burning fossil fuels analytical chemistry, look at how various factors can affect the reaction rates of chemical reactions, examine organic compounds and their importance in biology and look at how humans can best manage sources of energy and materials for the future.  

Major areas of study are:  
- Monitoring the Environment  
- Managing Chemical Processes  
- Organic and Biological Chemistry  
- Managing Resources

**ASSESSMENT**  
School-based Assessment (70%) includes an Investigations Folio with practical activities and a Science as a Human Endeavour task, and Skills and Applications Tasks that include tests.  

External Assessment (30%) is an exam at the end of the year.

**SPECIAL REQUIREMENTS**  
Nil
### Physics

**CODE** PY15E  
**LEVEL** Stage 2  
**LENGTH** Full year  
**CREDITS** 20  
**CONTACT PERSON** Toby Ward  

**ESSENTIAL BACKGROUND**  
Stage 2 Physics builds upon the concepts and knowledge studied in Stage 1. C grade or better in Stage 1 Physics A and B. Strong numeracy skills are essential.

**CONTENT**  
In Physics students integrate and apply a range of understanding, inquiry, and scientific thinking skills that encourage and inspire them to contribute their own solutions to current and future problems and challenges, and pursue scientific pathways. Students will investigate the motion of objects and particles through the lens of Newtonian Physics and then investigate the Theory of Special Relativity and how it links matter and energy at high speeds. Students will discover the properties of electric and magnetic fields and their importance to the modern world. Students will also develop an understanding of the interaction between matter and light.

Major areas of study are:  
- Motion and Relativity  
- Electricity and Magnetism  
- Light and Atoms  

**ASSESSMENT**  
School-based Assessment (70%) includes an Investigations Folio with group and individual practical reports and essays, and Skills and Application Tasks that include tests.  
External Assessment (30%) is an exam at the end of the year.

**SPECIAL REQUIREMENTS** Nil

### Psychology

**CODE** PSC5E  
**LEVEL** Stage 2  
**LENGTH** Full year  
**CREDITS** 20  
**CONTACT PERSON** Toby Ward  

**ESSENTIAL BACKGROUND**  
This course builds on the skills and knowledge acquired in Stage 1 Psychology. Strong literacy skills would be an advantage. C grade or better in Stage 1 Psychology A and B.

**CONTENT**  
This subject will explore the following topics in detail as explained in the SACE Board Curriculum statement (available online).  
1. Introduction to Psychology  
2. Social Cognition  
3. Learning  
4. Personality  
5. Altered States of Awareness  
6. Healthy Minds  

**ASSESSMENT**  
School-based Assessment (70%) includes an Investigations Folio with group and individual practical reports and essays, and Skills and Application Tasks including tests.  
External Assessment (30%) is an exam at the end of the year.  
The folio of Research Investigations is also externally moderated.

**SPECIAL REQUIREMENTS** Nil
ACARA
Australian Curriculum, Assessment and Reporting Authority

ASBA
Australian School-based Apprenticeship

ATAR
Australian Tertiary Admission Rank. The ATAR is derived from the university aggregate and is an indicator of how well a student has performed relative to others in the population, taking into account variations in student participation from year to year. The ATAR is used for university entrance purposes.

Australian Curriculum
The Australian Curriculum is being developed progressively by the Australian Curriculum, Assessment and Reporting Authority.

CAR
Course Admission Requirements used for TAFE entry purposes.

Counting Restrictions
Counting restrictions are used where it is deemed desirable to limit the number of credits that can be counted towards a university aggregate and the ATAR in a specific subject area.

Curriculum Pattern
A selection of subjects required in order to qualify for the SACE.

Credit
Ten credits are equivalent to one semester or six months study in a particular subject or course.

DfE
Department for Education

Flexible Option
Flexible option refers to the final 20 credits of study contributing to the university aggregate and the TAFE Selection Score.

IPP
Industry Pathways Program

ISEC
Intensive Secondary English Course

PLP
The Personal Learning Plan – a compulsory Stage 1 subject studied in year 10.

Precluded Combination
Two subjects are a precluded combination if they are defined by the universities and TAFE SA as having significant overlap in content.

Prerequisite
A formal requirement that is needed before proceeding to further study.

Recognised Studies
Studies such as higher education studies or Vocational Education and Training (VET) awards approved by the SACE board as counting towards the SACE and deemed by the universities and TAFE SA as being eligible to be included in the calculation of the ATAR and TAFE SA Selection Score.

Research Project
A compulsory Stage 2 subject.

RTO
Registered Training Organisation

SACE
The South Australian Certificate of Education

SACE BOARD
South Australian Certificate of Education Board

SATAC
South Australian Tertiary Admissions Centre

Semester
50 to 60 hours of programmed lesson time – subjects of one unit are a semester in length.

Stage 1
The first of two levels of the SACE – this will usually be a student’s 11th year of schooling.

Stage 2
The second of two levels of the SACE – this will usually be a student’s 12th year of schooling.

STAT
Special Tertiary Admissions Test

TAFE
Technical and Further Education

TGSS
Training Guarantee for SACE Students

TAS
Tertiary Admission Subject – a SACE Stage 2 subject which has been approved by TAFE SA and the universities for tertiary admission.

Unit
Half a year (50 to 60 hours of programmed time) of full-time study.

VET
Vocational Education and Training

Youth Allowance
Youth Allowance is a means tested payment made to full time students aged between 16 and 24.
Some Relevant Publications and Websites

The following publications are made available to students at various times to help in the course counselling process. Information can also be found on the web sites listed.

Planning your Career

Making a decision about what type of career you want can be hard, especially if you are new to the workforce or looking to change your career. Below are some simple steps to help you through the decision making process.

STEP 1 – SELF ASSESSMENT

To find a job that will interest you and keep you motivated and challenged, it's important to understand your own interests, abilities and values.

Your interests
- What do you enjoy doing?
- What inspires and motivates you?

Skills and abilities you have developed
- Education
- Previous employment or work experience
- Voluntary or charity work
- Extracurricular activities (e.g. sport, music, social clubs).

Values and Influences
- What aspects of work are important to you? e.g. respect, recognition, security, achievement, status, money
- What influences are important to your decision making? e.g. health, family, community.
- What working conditions are suitable for your lifestyle?
- Do you have health issues to consider when planning your career path?

STEP 2 – CAREER ASSESSMENT

Once you have thought about a few different career paths that may interest you, do some industry research to find out what each career involves. Refer to our Online Job Search information factsheet for useful websites to help you gather the following information.

Job Outlook
- What are the employment prospects?
- What are the predictions for the future of the industry? Will the industry grow?
- Can you further develop and progress in the career?

Education and Training
- Do you have the right qualifications, education or training?
- Can you do on the job training or study while you work in the career?
- Are there opportunities for further education or training?

Duties and tasks
- What duties and tasks will you be required to perform?
- Can you perform these duties and tasks?
- Will the duties and tasks keep you motivated?

Industry knowledge
Talk to people who already work in the industry and ask questions to help you with your career decision making.
- What does your typical work day involve?
- What do you most like about your job?
- What do you least like about your job?
- What training would you recommend to prepare for the job?
- Do you know of any alternative training pathways?
- Have you had the opportunity to progress in your career and develop further skills?

STEP 3 – CAREER DECISION

When it comes to making a decision on what career path you want to pursue, make sure you explore all the options available to you.
- Make a decision that will suit your personality and the working environment that you are interested in, as well as the career goals that you have set for yourself.
- If you are uncertain about your career choices, don't worry too much. The average Australian will have between five and seven career changes in their lifetime.

Remember that in each job you will develop new skills that you can apply in other jobs. You will also meet more people, which is ideal for career networking.

STEP 4 – TAKE ACTION

Now that you've gone through the decision making process, it's time to take action. Get your resume ready and apply for any suitable jobs that you find. Keep in mind that things don’t always work out the first time. You may even need to go through the steps again to find what you’re looking for, but don’t give up. Remember that having a job, even if it’s not the one you want, can lead to getting the job you do want.

ONLINE JOB SEARCH INFORMATION
You can find useful information online to assist you in your job search. On page 126 is a list of useful websites relating to job searching, career development, studying and training.
Planning your Career

ONLINE JOB SEARCHING
www.jobsearch.gov.au – search for jobs by choosing your state, local area and occupation category. Create a job match profile, upload your resume and use the instant job list to find jobs based on your skills and experience.
www.joboutlook.gov.au – search for a career that you are interested in and find information on the trends and job prospects for that career.

STARTING A BUSINESS

STUDYING OR TRAINING
www.australianapprenticeships.gov.au – find out about apprenticeships and combining employment and training.
